Majority in Missouri Oppose Implementation of Post-Roe State Law Which Would Ban All Abortions, Including in Cases of Rape and Incest; Post-COVID Economic Woes Have Nearly Half in Show-Me State Financially Worse Off Than Before Pandemic, Blaming Biden For Inflation:

SurveyUSA's latest exclusive polling for Gray Television's Missouri stations (KMOV-TV in St. Louis, KCTV-TV in Kansas City, KYTV-TV in Springfield, KFVS-TV in Cape Girardeau, WGEM-TV in Quincy, IL; KYOU-TV in Ottumwa, IA) and for KRCG-TV in Jefferson City and KOAM-TV in Pittsburg, KS focuses on the economy, the Russia-Ukraine war, COVID-19, and the future of Roe v. Wade and abortion. Highlights from the research which follows: Economically , 45% of Missouri adults say their family is financially worse off than it was before the pandemic; 10% say they're better off now. 41% say they're doing about the same. 45% say President Joe Biden is most to blame for inflation; 20% lay the blame on corporations focused on their profits. 8% think Republicans in Congress deserve most of the blame. On the War in Ukraine , 37% approve of the way President Biden is handling the US response to the war (14% strongly approve, 23% somewhat approve); 50% disapprove (20% somewhat disapprove, 30% strongly disapprove.) 51% say if Russia attacks a NATO country, US troops should be sent in to defend that country. 20% say US troops should not be sent. 29% aren't sure. 70% are worried (27% very worried, 43% somewhat worried) that the Russia-Ukraine war could escalate into World War III; 17% are not very worried, 5% not worried at all. Most say life has returned to normal from the pandemic – at least to an extent. 24% say life is back to normal; 45% say it's somewhat back to normal. 28% say it is not. On the topic of abortion , 48% of Missourians say at least some abortions should be permitted, 46% say very few or none should be allowed: 26% say abortion should always be legally permitted 22% say it should be legal with some restrictions 29% say abortion should be illegal, except in cases of rape, of incest, or to save the mother's life Just 13% say abortion should always be illegal – something a Missouri law is set to automatically enact should Roe v. Wade be overturned. 47% say Roe v. Wade, the landmark 1973 US Supreme Court case that legalized abortion nationwide, should remain the law of the land. 31% say Roe v. Wade should be overturned. Should Roe be overturned, a majority of Missouri adults – 58% – are opposed to an existing Missouri law that would automatically go into effect and ban all abortions, including in cases of rape and incest – as just noted, a position only 13% of Missourians agree with. 23% support the law going into effect Full results follow ...

About: SurveyUSA interviewed 2,175 Missouri adults online 05/11/22 through 05/15/22, using sample provided by Lucid Holdings LLC of New Orleans. The pool of adult survey respondents was weighted to US Census targets for gender, age, race, education, and home ownership.

1 Compared to before the pandemic, is your family financially better off, worse, or about the same as it was?

10 If Roe v. Wade is overturned, an existing state law in Missouri would take effect, automatically banning all abortions, including those in cases of rape and incest. Do you support? Or oppose? this state law?

Statement of Methodology: SurveyUSA is an independent, non-partisan, apolitical research company that conducts opinion surveys for media, academic institutions, commercial clients, non-profits, governments, agencies, and elected officials. SurveyUSA opinion research is conducted using a methodology optimized for each particular project. In some cases, this means data is collected 100% by telephone; in some cases, 100% online; and in other cases, a blend of the two. For those projects that are conducted “mixed-mode” (or “multi-mode”): Respondents who have a home (landline) telephone are interviewed by phone, sometimes using live interviewers, other times using the recorded voice of a professional announcer. The youngest male is requested on approximately 30% of calls to home phones, the youngest adult is requested on approximately 70% of calls. This method of intra-household selection reduces the potential for age and gender imbalance in the unweighted sample. Re-attempts are made to busy signals, no-answers, and answering machines. Landline telephone sample is purchased from Aristotle of Washington DC. Respondents who do not use a home telephone are interviewed on an electronic device, which means, for some projects, that call-center employees hand-dial cell phones and interview respondents verbally on the respondent’s cell phone, and means, for other projects, that SurveyUSA displays the questions visually on the respondent’s phone, tablet, or other device. Sample for respondents who do not use a home telephone is purchased from Aristotle or from one of several other research companies that provide access to cell respondents. Where meaningful, SurveyUSA indicates the percentage of respondents who use a home phone and the percentage who do not, and crosstabs by this distinction. Responses are minimally weighted to U.S. Census or voter file targets for gender, age and race. Target (cell) weighting is used. On questionnaires that ask about political party identification, SurveyUSA may or may not weight to Party ID, depending on client preference. Where necessary, questions and answer choices are rotated to prevent order bias, recency, and latency effects. On some studies, certain populations are over-sampled, so that the number of unweighted respondents exceeds the number of weighted respondents. Each individual SurveyUSA release contains the date(s) on which interviews are conducted and a release date. If interviewing for a particular study is conducted in Spanish, or in any other foreign language, it will be noted on the specific release. If no notation appears, interviews are conducted in English. Where respondents are filtered, such as adults, filtered to registered voters, in turn filtered to likely voters, SurveyUSA describes the filtering on the specific release. On pre-election polls in geographies with early voting, SurveyUSA differentiates between respondents who have already voted and those who are likely to vote but have not yet done so. On research completed prior to 12/31/16, SurveyUSA assigned to each question within the instrument a theoretical margin of sampling error. Effective 01/01/17, SurveyUSA assigns to each question within the instrument a credibility interval, which better reflects the sampling uncertainties associated with gathering some percentage of respondent answers using non-probability sample. Though commonly cited in the presentation of research results, “sampling error” is only one of many types of error that may influence the outcome of an opinion research study. More practical concerns include the way in which questions are worded and ordered, the inability to contact some, the refusal of others to be interviewed, and the difficulty of translating each questionnaire into all possible languages and dialects. Non-sampling errors cannot be quantified. This statement conforms to the principles of disclosure as recommended by the National Council on Public Polls (NCPP). Questions about SurveyUSA research can be addressed to editor@surveyusa.com.
