Manifesto.

“CATGE holders are rebels, and they are part of our revolutionary army. We are the CATGE army”

The CATGE Team

Introduction.

Cryptocurrencies
among other things
were meant to be
the answer from the people to the elites
manipulating
the stock market, real estate and all the other speculative assets.

Bitcoin was born to make us free

Ethereum was born to change the world thanks to Blockchain
and Doge was born to show the elites that even a meme can be stronger than them.

but

“ The cryptocurrency market is broken ”

and you know what?

We had enough.

Despite all the good intentions

in mid-2021
the *TRUTH* came out

Big investors were manipulating cryptocurrencies as well.

The greatest evidence came from **Elon Musk's and Tesla's tweets** about Bitcoin and Dogecoin

- *first shilling all the cryptocurrencies*
- *then ditching Bitcoin after it pumped*
- *rinse and repeat over and over*

" The cryptocurrency market is broken "

and you know what, AGAIN?

We had enough.

What's \$CATGE

It's our rebellion

It's the new King of Meme Coins

*It's more than a strong community
It's an ARMY*

*It's the symbol for the new
generation holders*

*It's the memecoin that will
flip over \$DOGE*

*It's the CAT that will show to
the old manipulators that
the cryptocurrencies belong
only to the community and
no-one else*

Contract

0x1ca23d55bc741366d010274553a8aeaaefb0d583

Our Smart Contract has a very unique
game-changing feature for Binance Smart Chain tokens

We feature a reward/commission fee for transactions
but such fee fades with time.

\$CATGE IS EXCHANGE FRIENDLY

This is because other Smart Contracts like SAFEMOON, HOGE or SAFEMARS
despite enjoying a good price stability
they are not exchange friendly.

\$CATGE Binance Smart Contract

0x1ca23d55bc741366d010274553a8aeaefb0d583

In simple terms

QUESTION

Would you ever accept payments in a currency with a 10% tax for any single transaction?

ANSWER

If the answer is **NO**, then you understand why **no one** could ever accept payments in HOGE in the future, just saying.

DOGE on the other end is about to become one of the standard exchange tokens **after Elon's manipulations**: more and more hotels, restaurants, and other commercial activities are accepting it.

Yes, after ditching Bitcoin, Elon's favorite cryptocurrency is on its way to **become the next payment standard**.

We can't let that happen!

\$CATGE

***NO Contract owner
NO DEV Wallet***

***Ownership distribution is way cleaner
than elite's favourite coins***

HOW TO ACHIEVE THE \$CATGE GOAL?

For the *first six months*, our contract reflects the SAFEMOON's model with *commission/reward* for every transaction:

this is very effective in order to create price stability

After the six months, the transaction fees will fade to zero:

this is the only way CATGE can grow as fast as SAFEMOON did, but can compete with DOGE for becoming the next real standard for payments worldwide.

Reward/commission calendar works like this:

- *Until June 15th-2021: 7% Holders rewards for every trade and 5% to liquidity pool*
- *Until July 15th-2021: 4% Holders rewards for every trade 3% to liquidity pool*
- *Until October 15th-2021: 2% Holders rewards for every trade 2% to liquidity pool*
- *After October 15th-2021: No more trade commission*

Charity

Charity.

CATGE will sign partnership in June 2021 with the most popular animal charities in the world, to help street cats have a better life.

CATGE will donate 2% from their current marketing wallet to charities in this way:
