

## MSGLeads Review

# A New Generation of Syncing Email Leads Directly Inside Facebook Has Arrivcc...

Up until now, the only way to generate email leads on FB has been to run a lead ad or send people off of FB to an opt-in page.

If your customer has been engaging with a prospect within the FB messenger (with or without a FB messenger software), not only does this break engagement which your customers work so hard for, but it makes your customers' prospects jump through hoops to finally enter their email address (only which a small percentage actually do).

It kills every benefit of personal engagement, immediately.

## What Is MSGLeads?

MSGLeads isn't a FB messenger software, but it does integrate with all third party messenger/bot software that you may own (they can use MSGLeads without Facebook messenger software too)!

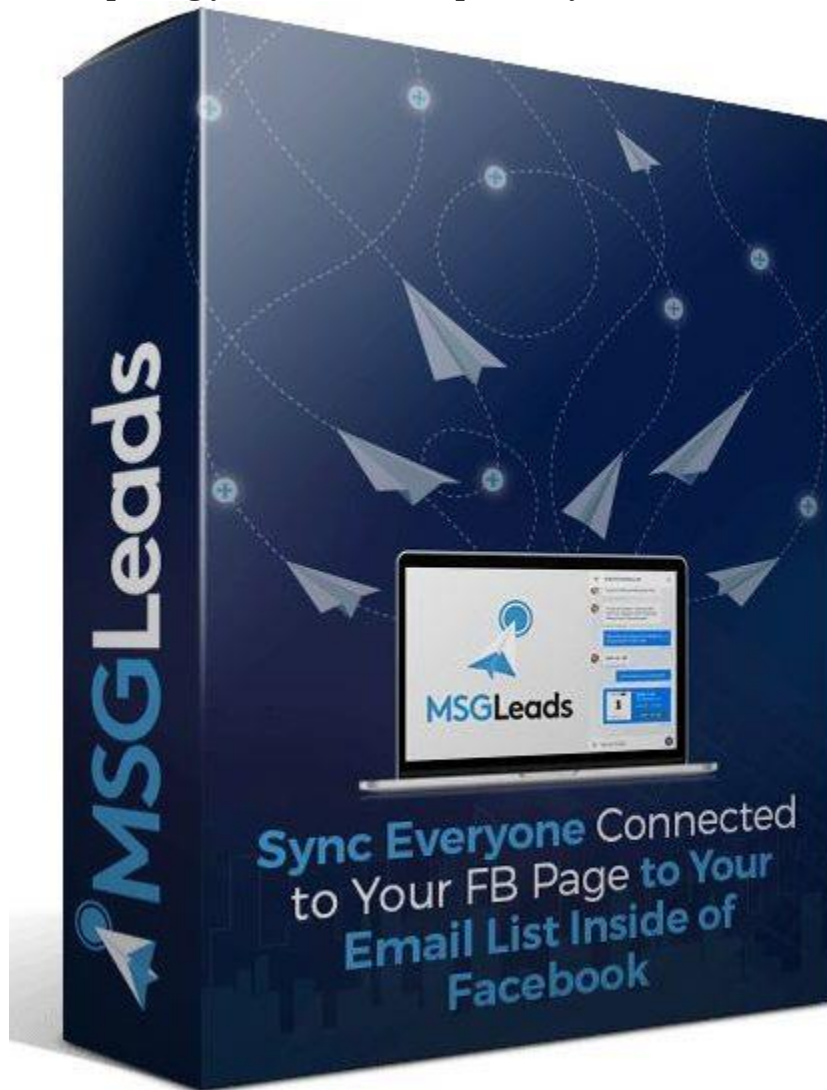

MSGLeads bridges the gap between FB marketing & e-mail marketing by allowing your customers to sync email leads to any email list, directly inside of Facebook.

Now, your customers can generate email leads on Facebook:

- ...without typing one line of code
- ...without sending their prospects outside of FB
- ...without their prospect ever having to enter their email address
- ...without having to export/import any lead manually

We integrate with all major auto-responders!

Imagine being able to generate FB messenger leads & email leads at the exact same time, opening your customers up to truly diversified marketing.
