

Why do I need a mobile app?

Boost your business

81% of salon owners say their app has a positive effect on their bottom line.

Engage with customers

43% of good and drink businesses say an app has improved client communication.

Promote your brand

79% of health and fitness businesses say an app improves their image.

Add your business' Facebook and Twitter pages to the app! Most successful businesses today know the importance of engagement through social media, and are already building relationships with customers on various social platforms. Let your app serve as an extra distribution channel for social content you are already creating!

Media Galleries

Showcase products and services with a beautiful photo gallery and demonstrate your business in action with compelling videos which customers can browse and watch from right inside the app. Seeing is believing - give customers that extra vote of confidence in your business.

YOU CAN FULLY CUSTOMIZE YOUR APP

Add Features

Contact & booking made easy

Always be in your customer's reach with one-touch calling and emailing. If your business thrives on bookings, simplify this process and connect your booking page to the app!

Include videos

Add your latest YouTube videos and customers will be able to watch them from directly inside the app. Make the app more interactive with videos!

If you are an investor, business owner or own residential property-

Company Information

We are SITL BELMONT & work with organisations and property investors to ‘map out’ their existing project management practices against a baseline, identifying and prioritising opportunities. We develop action plans and execute development. The work we do for the clients allow our business to grow is based upon the strength of the relationships we keep.

Operational Effectiveness

I think the key thing which can allow businesses and property investors to increase revenue and understand how to truly grow are the systems we can provide alongside with our support and constant analysis.

We would review business plans & your property portfolio, analyse your trading history, operational effectiveness, set KPI's, monitor asset vs liabilities to help create momentum.

The next step up – is the associations that come with being a part of SITL Belmont & Associates.

With connections in a number of business sectors, we assist sole traders, property investors and organisations to save money and improve performance by introducing key parties to a relationship and can assist in negotiations.
