Funds from the ICO will be used like?

- ✓ 35% of the funds will be used to build the EPay platform and perform upgrades to the system, which includes team recruiting, training, and the development budget.
- ✓ 50% will be used for EPay branding and marketing, including continuous promotion and education of EPay and blockchain innovations in industry mediums. A sufficient budget for various advertisement activities, to help EPay become popular among investors, and to attract active users to the platform.
- ✓ 15% will be kept in reserve to cope with any emergency or unexpected situation that might come up.

Buy and sell Crypto directly to and from your wallet. Load and manage your EPAY Card, accepted at all Visa® merchants and Visa® compatible ATMs worldwide.

Risks

There are many risks involved in running an exchange. We understand this and have the skills, experience, and leadership to overcome them.

Security

Many crypto exchanges have failed due to poor security procedures. Most security breaches could have been prevented by taking simple precautions to protect critical resources. Our team has developed Epay with security as the foremost concern in their minds. We strive to ensure that we have followed all the industry best practices when it comes to securing infrastructure and data including ISO/IEC 27001:2013 and the CryptoCurrency Security Standard (CCSS).

Market Competition

We know this will be an ultra competitive space. There are probably hundreds, if not thousands of teams wanting, planning or doing exchanges. Competition will be fierce. But in this age, this is a common risk in any decent concept/startup or mature company. The question is: given our team, track record, experience, industry resources, and product, do you believe we stand a better chance than the rest of the pack? If yes, then please join our ICO.
