

*To date, 31 staff members have tested positive for COVID-19. Fourteen staff are either back at work or returning this week.*

*The safety and care of our residents is our top priority. We are following CDC guidance regarding allowing asymptomatic staff, who have tested positive, to return to work. Steps we are taking out of an abundance of caution, include:*

- Requiring a facemask at all times while in the center until all symptoms are completely resolved or until 14 days after illness onset, whichever is longer.*
- Restricting contact with severely immunocompromised patients (e.g., transplant, hematology-oncology) until 14 days after illness onset.*

*In addition, we are working diligently to take heightened precautions and to adhere to overall protocols outlined by the Center for Disease Control (CDC). We are also working closely with our local health department to prevent exposure and to protect all our residents and staff at the Center.*
