Steroide Iniettabile. When a person experiences a migraine, there is a restriction of blood flow to the brain, which causes pressure and pain. As a result of this, oxygen levels are compromised. The lack of oxygen in the brain results in a sudden and rapid increase in blood pressure inside the head as a way of counteracting the hypoxia.

Just wanted to give a quick update for y♦all and future me that this is but a small part of the cycle (not just app cycle but in life). It♦s not worth being devastated about, even though I completely acknowledge that it is more than okay to feel sad and down about it for a bit. [have a peek here](#)
