It is recommended that men take Primobolan for a maximum period of 8 weeks at a time. During this period, the manufacturer suggested dose for medicinal purposes ranges between 100 - 150mg per day, and it has been reported that those athletes using Primobolan to increase performance have found appreciable results with that same dosage.

This anabolic androgenic steroid is derived from DHT and comes in both injectable and oral form. It was first used back in the US in the 1960's for various medical purposes. The effects of Primobolan have also been studied in breast cancer treatment. However, the use of Methenolone was quickly discontinued.

If you have ever lifted weights and have considered dabbling in Anabolic steroids, then the name 'Primobolan' should ring a bell. It is after all, touted to be the Austrian Oak's favorite poison. Well, Amie has never publicly admitted to using roids, let alone call Primobolan his favorite one. But speculation, clubbed with the incredibly mild nature of the compound has made it a crowd ...
