

# This Minecraft Mod Turns Mobs into Lego Figures

Someone has created an Minecraft mod that transforms the building game into the Lego game you've always wanted to play. It's not a stretch, considering that Minecraft is all built and Lego is all about creating things. Both are based on creativity and allow your imagination go wild and create whatever you can think of. They are a great pair and that's why we wrote about the Minecraft piston that is made of Lego.

We briefly mentioned Cirelectric, Redditor who shared an image of zombies dressed as Lego minifigures. It was adorable, but Cirelectric has since created an entire mod pack for that style. You can download the mod on your own should you wish, and it will give a brand new look to the majority of Minecraft mobs you'll encounter.

It's a cute pack that has one mob that's an eldritch nightmare. It might seem like the Enderman. However it's actually the porcine. Pigs are humanoid however they still crawl on ground. This is what we can only assume is an artistic decision that we mere mortals cannot understand. It's certainly something to behold, and if you want an image that will linger in your dreams, take a look at the image 13 in the post or click this link.

We're certain you won't be able to go to sleep after we shared our harrowing experience with you. MINECRAFT JAVA There are a lot of jokes in the comments that follow the same formula however Cirelectric seems to be taking the whole thing in stride. We have a lot of respect for the amount of work that something like this requires and we're somewhat scared.

This YouTuber's Pac-Man version will give you a bit more terror in Minecraft. This mod will give you more of a challenge than the major bosses of the game.
