# TURBOTUNE

Capability Statement

Mainframe Performance Improvement with Cost Reduction!
Get a R4HA Peak Load Cost Reduction Analysis
Reduce Monthly Licensing Charge (MLC)

Critical Path Software Inc is the Company and TurboTune is our software. CPSI is an IT consultancy delivering ROI and TCO cost reductions in the MLC and R4HA IBM Mainframe arena.

Critical Path will perform a Mainframe Performance and Cost Reduction Audit to determine your current performance level and to pinpoint any cost reduction improvements.

The process is simple and non intrusive; gather statistical data on your Mainframe, (we will tell you exactly what to gather) assign a key code to the file, send it to the Cloud for analysis and get back cost saving improvements that will cut your Mainframe operational costs.

CAGE CODE: 7GQ90 | **DUNS #**: 114807154

CORE COMPETENCIES

TurboTune Supports All Mainframes!

- Use TurboTune to save thousands of employee hours doing performance tuning and speed development cycles

- We have been in business since 1986. We are now a Global Company with Clients and Partners World Wide. We are an IBM Business Partner with hundreds of successful projects completed.

- TurboTune® is a powerful, statistical software tool created by CPSI to analyze mainframe I/O subsystems. This automated tool generates a series of reports, which describe in detail those data sets that are not optimized. This lack of optimization often produces a dramatic slowdown in performance with an associated increase in operating costs. Systems software under the I/O subsystem umbrella can include TSO, User Catalogs, MVS, IMS, DB2 bootstrap files and CICS, TMON, RMF, SMF, Omegamon, IDMS Drivers, ADABAS Drivers, Cache Controllers and all Buffering Tools.

- This tool is based on a "knowledge" database, which contains over 5.5M system statistics gathered from hundreds of client systems over the past 30 years.

DIFFERENTIATORS

We guarantee our findings—no gain no pay!

- WE SAVE MIPS! Our service always finds improvements that saves MIPS.

- We save DASD! Lots of it. Terabytes of DASD!

- We save CPU Cycles. Our analysis is 100% on target.

- There is no RISK to any client. Our fee comes out of savings.

- Our CAPABILITY is superior to any other tuning company, package, consultant.

- TURBO is capable of analyzing any size data center in less than 14 days.

- TURBO software is unique-it calculates % savings.

- All of TURBO's internal formulas are proprietary.

- TURBO will find things a client never realized was in their data center – good and bad.

- Use our CICS Contention Analyzer to get rid of spiking **see our website for a more in depth explanation of the above chart

- Use our JCL Analyzer for additional performance improvements – sometimes 15% more.

- We are the only company that guarantees that after we leave you will be spending a lot less DP dollars than before we got there!

PAST PERFORMANCE

- **CPSI has been in business for 30 years.**

- We are an *international* Company with contacts / clients in Australia, Brazil, Mexico, UK, Spain, Singapore, and licensing agreements with 3 large banks located in Belgium, Denmark and the US.

- *Some clients include:* Humana Healthcare, Citibank, Wells Fargo, Wachovia Bank, Vantiv, Aetna, Chase Bank, GE, HIP, QVC, Prudential Insurance and some 90 others.
