FREQUENTLY ASKED QUESTIONS

Why embed LEDs in a garment?

Improved visibility enhances safety. Lights located higher in a garment than on a bike means a greater chance of being seen. Many customers report that they feel naked and vulnerable

without their *Visijax* cycle jacket or *Gilet* – a similar feeling to when one has forgotten to wear a helmet! A simple idea, yet producing washable electronics is quite complex. We made it work!

How does it work?

At the start of your ride or jog – perhaps on horseback – press the red button on the battery via the 'power' symbol on the front of the *Gilet*.

The LEDs will be activated in slow flash mode. Press the red button again for fast flash, or a third time, for constant 'on' mode. To switch off afterwards, press the red button.

Is the *Gilet* really washable?

Yes, in a delicate machine wash. Please refer to the care label on the garment. Simply detach the battery prior to washing. The warranty is invalidated if you wash the battery as well! The performance fabric is fully breathable so you can relax in comfort while riding or jogging!

How is the *Gilet* powered?

By a rechargeable lithium-ion battery. Typically, a four-hour charge offers 20+ hours.* A mini-USB-USB cable is supplied, so you can recharge via your laptop or a USB-enabled plug!

* In normal use

Good to know

Garment Data

Packaging: The battery and USB cable are supplied in a protective bag located in the pouch on the back of the *Gilet*.

Gilet with 11 LEDs
Outer: 100% Polyester
Lining: 100% Polyester

Breathability: 5927g

Designed in the UK
Manufactured in China

Warranty

Visijax offers a 12-month warranty on *Gilets*, T&Cs apply. In the unfortunate event of a faulty garment, customers should return their item to a store with the original receipt and packaging for exchange or refund according to policy/statutory consumer rights.

Product Returns

Please refer to your line manager for procedures. Contact us by email: support@visijax.com

IceID Tag

A free "In Case Of Emergency" tag is fastened to the jacket (with a second one included for a helmet). Follow the instructions contained in the jacket packaging. Simply register personal details, a chosen contact (e.g. next of kin) and medical information (e.g. allergies, blood group, prescription medication, etc).

In an emergency, like being knocked off a bike, first responders can quickly access these details by reading the QR code on the tag. Mobile phone reception will be required to use the service. Details are held securely in accordance with the Data Protection Act and the company operates a privacy policy.

Award-winner!

The *Consumer Electronics Show* in the USA is the world's leading technology event. *Visijax* became an *Innovation Award* honoree in the 'wearable tech' section – the equivalent of winning a tech "Oscar". Wearable Technologies Limited – parent company of *Visijax* – also won the *BQ Magazine* 2015 IP100 'Best in Patent IP Class' award.
