Our Mission & Vision

MISSION :

To Provide high quality refrigeration systems and services to customers in UAE, ME and Africa. To offer customers cost effective solutions to setup initial or expansion plans of their business.

VISION :

"Finding out where you have been is the only true way to see where you can be one day." Our Vision to be part social obligation to serve supply chain around the world with turnkey solution of refrigeration and cold storage. We Energize businesses and individuals around the world through the intelligence of our dynamic services, turning their challenges of temperature to control needs.

Our Values

Quality : It always remains the hallmark of our business

Passion : Passionate for providing cost effective products for all

Innovation : Sustained efforts for introducing an innovative cooling solutions to cater emerging business needs of the people

Trust : Maintain the highest levels of ethics, honesty and integrity in the business

Socially Responsible : Empathetic and Caring towards the deserving for the social noble cause

PRODUCTS : Refrigeration

The term refrigeration means cooling a space, substance or system to lower and/or maintain its temperature below the ambient one. In other words, refrigeration is artificial cooling. Energy in the form of heat is removed from a low-temperature reservoir and transferred to a high-temperature reservoir.

Air Conditioning

Alraya Coolings is one of the leading air conditioning contractors in the Sarjah, since its incorporation. Built on utmost customer satisfaction, reliability and engineering performance we have been successful to provide a complete solution to our valuable clients. We undertake various contracts for the design, supply and installation of air conditioning systems for all the commercial, industrial, residential buildings and villas.

HVAC systems are climate control systems installed in building to provide proper heating, ventilation and air conditioning. Additional to providing thermal comfort they are meant to provide acceptable indoor air quality and ability to regulate and maintain the systems.

Ducting System

Ducting systems can be installed either in the interior or on the exterior of a building visible or with a false ceiling in residential and commercial use as well. These are an excellent option in industry sectors such as food processing, electronics, pharmaceuticals, residential buildings, hospitals and medical centers etc. where there is a need for provision of a high level of quality and hygiene.

Our professional team understands that having the correct mechanical ductwork in place for your business is critical to having an efficient HVAC system.

We improve the quality of air you breathe inside your home. The use of environmentally safe products and state of the art equipment sets us apart from the rest. An efficient duct system helps in reduction of energy consumption as well.

HVAC systems are climate control systems installed in building to provide proper heating, ventilation and air conditioning. Additional to providing thermal comfort they are meant to provide acceptable indoor air quality and ability to regulate and maintain the systems.
