

Free Minecraft Server Hosting

We provide a free Minecraft server hosting with the full functionality of a paid server. Your Minecraft server will be free forever. However, at any time you can switch to a premium plan, which is a good choice for big communities. In this case, all the data on the server will be saved, such as your installed game servers, their IP addresses, maps, uploaded mods, plugins, etc. You will not need to buy a new server to transfer data from the free Minecraft server - everything will be transferred automatically.

Our servers are monitored 24/7 to ensure their uninterrupted operation. We guarantee reliable Internet connection and low ping. Our systems are secured against DDoS attacks. Our free Minecraft server hosting service supports mods and plugins. You can install several Minecraft servers at the same time for one server. You can also change the server's .jar file to your own. We don't limit slots. MySQL can be installed on the hosting via our control panel. You can get a free domain to connect to the game server. <https://gservers.org/> Ubuntu 20.04 OS is installed on all servers, and you get full access to it via FTP and MySQL.

We own and operate data centers around the world to keep our systems running 24 hours a day, 7 days a week. This ensures low ping and a failure-free service.
