Find Out How To Get To Your Minecraft Folder

So, we all know that it's important to get to your minecraft folder to install mods, texture packs, get screenshots, backup worlds, but generally you cannot seem to find your minecraft folder, proper?

Effectively now not! In this tutorial, I will show you the way to get to your minecraft folder on MAC. Let's get started!

Right here is how:

First, open your finder

Look on the bar at the highest of your display screen, the one that contains the apple brand and says "Finder" next to it.

If you look an that bar, you'll discover the "Go" button, click on it after which click "Go to folder", situated at the underside.

Sort ~/Library and then click on go, or hit the enter key in your keyboard.

Be aware:

The ~ signal is located above the tab button, press shift to use it! MINECRAFT PRISON SERVERS

This can deliver you to an inventory of folders, go forward and open the "Software Help" folder.

This can open even more folders, certainly one of them is the minecraft folder, open it.

Accomplished! You may have now opened your minecraft folder! Now you can proceed to obtain mods and other stuff you need to do!

Read tutorials if you do not know tips on how to download mods/backup worlds! You don't want to delete your world, or mess up you minecraft!
