## 1 — COVID SAFE TECHNOLOGY POWERED BY ANY TRACE

Touchless Visitor Registration

Our contactless solution enables your guest to check-in via their personal device, scan a QR-code, enter a virtual visitor lobby and confirm check-in, creating a 100% touchless visitor experience.

ANONYMOUS CONTACT TRACING PLATFORM

ANONYMOUS CONTACT TRACING APPLICATION AT LARGE SCALE

ANY TRACE DEVELOPER API

2

The AnyTrace platform works because it was designed as anonymous from the ground up, privacy is ensured. Our platform is highly scalable allowing us to onboard hundreds of thousands of locations in minutes, in any country, in any language. Our platform is redundant, as we support analogue and digital contract trace registrations.

"Turn-key solution for enabling global contact tracing."

3 — WE HAVE THE SOLUTION

Facial Mask Screening

Empower your security teams to screen visitors for facial mask adherence right at the point of check-in. Allow the visitor check-in, only when mask adherence is confirmed by the Veris terminal.

WHY ANY TRACE?

Privacy, hyper-scalability, and redundancy plague typical contact tracing solutions. The AnyTrace platform addresses these issues.

4

The Application Programming Interface (API) allows third-party developers to enable contact tracing into existing platforms and web applications. A three-tiered pricing model caters to businesses of any scale.

5

COVID-19 Health Declaration

Add a configurable COVID-19 screening questionnaire to the overall visitor flow, mapping details such as latest travel history, COVID-19 symptomatic status, and capturing relevant data for every visitor.

Wear your mask at all times

6

Contact Tracing & Tracking

Ensure that your visitor management process aligns with WHO-recommended contact tracing. Ensure easy access to an accurate and detailed record of all visitors who enter your premises, in real-time.

## 8

Emergency Broadcasts & Alerts

Trigger and broadcast alerts to all hosts and visitors present at your premises, incase of emergency. Reach all checked-in members instantly via sms/mail within a few clicks on the Veris dashboard.

ALERT

9

Touchless Staff Attendance

Replace the infection-prone biometric solution with our facial recognition based clock-ins, ensuring a zero touch attendance experience while integrating with your existing HRMS employee management system.
