

Duncan Campaign Forces Rep. Krug to Finally Listen to Constituents on Saratoga CAFO

"It's obvious that the real reason for Representative Krug's sudden opposition to the CAFO in Saratoga and its high capacity wells has more to do with his floundering campaign than the high e coli levels in Nepco Lake and Lake Wazeecha," said Dana Duncan, Democratic Assembly Candidate.

"For nearly three years local residents have vocally expressed their opposition to this project and up until now my opponent has refused to take a position on this critical local issue." Duncan continued, "In contrast, I've listened to these residents concerns and have taken a firm stance against high capacity wells which fail to consider overall impact to the area as well as all CAFOs in Wisconsin. I hope he will examine my other proposals and adopt them also."

"This sudden change of heart on this critical local issue by my opponent is just a cynical attempt to distract voters from the fact that he has been wrong on this issue for nearly three years," said Duncan. This isn't leadership; this is simply a bold-face attempt at political manipulation. First, per diem, then term limits; how many other positions will he change to try to win this election?" concluded Duncan.
