

USE AT YOUR OWN RISK

The point of this site is to provide a list of private servers and the clients and addons to go with them.

I have no affiliation with r/wowservers or the servers listed below. This list is from r/wowservers and will be kept updated to match the original. If you want a server added or removed from this list(not r/wowservers) please contact me at admin@wowservers.net

The site doesnt have an SSL cert at the moment but if that changes the idea is to open a forum to discuss private servers or just wow in general. Rules would be very lax and moderation would only be here to delete off topic/spam posts.
