**The King Gottwald Peter with a Full of Thank for all policy, Secretary General's, Chairman's & Representatives, all Organization's, The Council's and Department's, all State representatives and Government's, I am really very Thankfull for Your Great Help and Protection**

---

Thursday, November 17, 2016

I Thank You very much to everyone who supports me and gives me the opportunity to move freely, without hard problems and or complete misinformation.

Thank you for your support and communication, and oppression, and especially I want to announce that my achieved results are therefore also result for your party and for the future of your nation, each of you gains the Earned entitlements and remuneration.

The ability of our future success, your country can own and freely uses much more power, and the world of international politics significantly grow at a really dynamic levels that can remove most of the crises around the world.

Today, your country is already legally can claim the value of new territories on a global civilization, as well as the right for the demands of your country on your own values of civilization in the value of the most developed countries. Joint Forces, as the strongest armies around the world, the largest political logistics, the great advantage of a global dimension to the economy, many important possibilities that can change our whole world. It is advantageous to promote the right way, mainly because real justice.

Stop Slavery, Crime, stop modern-day crimes, it's hard step, but one day, together we can provide a much better world that can be mature and efficient without criminal structures as well today European policy.

Thank you very much everyone for your support, I can be a lot more freer, but still stood by the programming of other people without my full freedom still under espionage and disinformation, oppression and freedoms of natural principles, as well as discrimination and apartheid. People must be punished, there is no possibility to oppose, everyone loses any rights and claims or identity. Europe and such a policy, it had not even EXISTING people, contact with such a person is only a complication and a threat.

Therefore, I certainly thank you to everyone who would like to support my offer of joint projects, opportunities for the development of military colony, other military centers, early planetary military headquarters and forces of bilateral and multilateral frameworks, is certainly good and advantageous to promote our common strength and grow together because it is a good step for the future of our people and stabilizing the current situation.

Thank you for you and for your efforts to support means greater security for the stabilization of global rights and political principles, the same way the security future of peace which is important for the function of the whole world and politics.

Our cooperation armies for you who can provide advanced power and rapid development of security in your country as well as worldwide.

Today, you help me, but thanks to my early because together we can ensure security throughout the world. A world in which there is no longer any effective conflict, it is a step that is advantageous to work and to promote, develop and win!

Above all Your main kindly ask your support for genuine freedom, pleading that only me, because every day there are many people who, due to the situation today, they, their friends, their families, each of them will have to attend the executions of death, a thousand; One hundred thousand people and maybe more than a million. Just looking really values crimes, such a judgment would be exercised by everyone who owned a good moral foundations and political responsibility, so I calls to be understood that Europe today is really at the level where it is necessary initiate nuclear bomber and completely destroy any such existence.

So, today is the most important act, promoting freedom, securing direct communication, the official center for communication, joint sessions and strategy principles of UNGA Convention together with the UN Charter.

I thank each of you who are really trying to promote the development of global security and justice, to ensure our remuneration and zaslouzny success, but I want to ask for your keeping is because of our ability to progress without cost if is not opportunity to use legally communication centers and or at least some logistic teams.

Today, many people in Europe who are willing to stand up, many groups and strong alliance, site of personality, a thousand and a hundred thousand, but without communication and the ability to grow in accordance with the legal principle, there is no possibility for any progress, and is therefore a waste of time . Today, the most important example is to work for even the most simple steps, such as establishing simple communication centers for us to ensure they can grow strong logistics and strategies immediately to prevent terrorism.

Thank each of you who are really trying to promote world safety and development of the countries in the world, and I to you it really wants a lot of good success in the interests of your own session and a step, my goal is to promote also your nation and country, your country and civilization , also your policy and the growth of our common circuit.

Just I apologize for my often, poor communication, can not by themselves communication, I every day I have too much work and lack of stable opportunity for us, is that I really like living here as in prison, it is not a place for communication capability.
