

dApp Staking

How to participate in the dApp Staking Reward List

To make sure you get your rewards by staking on the AGE OF CHRONOS dApp, follow these simple steps:

- Link your substrate account with the EVM account using Astar Pass:

<https://astarpass.astar.network/#/register>

You will receive your rewards on your EVM account.

- Stake your ASTR tokens on Age of Chronos.

You can pass your ASTR tokens from one dApp to another without unstaking.

How is staking calculated?

We will use monthly weighted average staking balances for reward calculation to prevent the user from staking a large sum the day before the snapshot and then moving the funds to other dapps or removing staking the day after the snapshot.

For example, if the user stakes 100,000 ASTR the day before the snapshot, the weighted average balance will be $0 \times 29/30 + 100,000 \times 1/30$, only 3,333 ASTR instead of 100,000 ASTR, because 100,000 ASTR is staked only 1 day out of 30 in the month.

** Read the example table for further understanding:

		Activity in first 3 months		Snapshot end of 3 months	
Users	Start point balance	Add	Remove	balance	average balance
user 01	10,0000	5,000	-3,000	12,000	12,800
user 02	14,0000	0	0	14,000	14,000
user 03	0	20,000	0	20,000	18,000
user 04	0	0	0	0	0

		Activity in first 4 months		Snapshot end of 4 months	
		Add	Remove	balance	average balance
		0	0	12,000	12,000
		2,000	0	16,000	15,200
		0	-20,000	0	6,000
		30,000	0	30,000	28,000

		Activity in first 5 months		Snapshot end of 5 months	
		Add	Remove	balance	average balance
		0	0	12,000	12,000
		0	0	16,000	16,000
		0	0	0	0
		0	0	30,000	30,000

		Activity in first 6 months		Snapshot end of 6 months	
		Add	Remove	balance	average balance
		5,000	0	17,000	16,300
		0	0	16,000	16,000
		0	0	0	0
		0	0	30,000	30,000

The first snapshot will take place after the first 3 months, after which we will proceed from month to month.

The rewards that I would find in this pdf and in the general infographic only concern the first 6 months. Don't worry, other prizes will be added later and if some of the limited number prizes are sold out, and we will communicate this before the snapshots.

** For rewards with limited numbers, such as The Great Architect, under equal conditions, the user who starts staking first in chronological order will be rewarded.

Other users will be able to request one or more lower level rewards by contacting the SFY Labs team.

5.000 Astar Staked (3 Months)

Not Limited

Original Nft Artwork by Ulderico Martinelli

10.000 Astar Staked (3 Months)

Limited to 30

Common Nft Item for Donkey Gang collection

Age of Chronos - Starter items

Equipped on your game character, they grant abilities helping you level up.

200.000 Astar Staked (3 Months)

100.000 Astar Staked (6 Months)

Saurus Crew Nft

All Saurus will be considered expedition pets in Age Of Chronos, returning to owners by bringing game materials, which will later be used to craft the items. Materials will be airdropped based on player level in the game.

250.000 Astar Staked (3 Months)

125.000 Astar Staked (6 Months)

Limited to 200

Age of Chronos - Time Squad character

Receive one of the four characters that will be used to play and complete ChronoDungeons for free.

In a bleak future world ravaged by environmental disasters and global conflicts, humanity faces extinction after a devastating thermonuclear war. Just as hope seems lost, an ancient alien race, the Arkonians, intervenes. They had created humans millennia ago and now give humanity a final chance: find a peaceful solution to their problems within six months, or face annihilation.

- Desperation drives nations to negotiate, but prolonged talks lead to rising tensions. Exploiting the crisis, powerful mega-corporations form Nomindo Corp, offering solutions in exchange for global control. Over two centuries, Nomindo Corp establishes an oppressive regime, erasing historical memory, and manipulating generations into compliance.

Amid this darkness, Zaratrix, the last member of the resistance group Order of Adam, forms the Time Squad. This team, consisting of uniquely skilled individuals, travels through time via ChronoTech Portals to recover lost knowledge and challenge Nomindo Corp's dominance. Their mission takes them through ChronoDungeons, blending futuristic and historical elements, where they collect vital chrono-technology and artifacts.

Armed with advanced knowledge and a connection to ChronoTech Portals, the Time Squad battles through challenges, uncovering hidden truths about Nomindo Corp's rise to power. Their journey offers a glimmer of hope, a chance to redeem humanity from tyranny and restore the lost legacy of the past.

HASC- Hip Alien Secret Club

Unique digital collectibles living on the BITCOIN blockchain, minted with Ordinals and hand drawn by SFY Labs.

Your doubles as your Secret Club membership card, and grants access to members-only benefits:

Access to the SFY DAO , allowing you to vote and make decisions on team work. Access to exclusive treasure hunts to win digital fragments minted by SFY Labs on Bitcoin.

WHAT IS ORDINAL THEORY?

Ordinal theory concerns itself with satoshis, giving them individual identities and allowing them to be tracked, transferred, and imbued with meaning.

Satoshis, not bitcoin, are the atomic, native currency of the Bitcoin network. One bitcoin can be sub-divided into 100,000,000 satoshis, but no further.

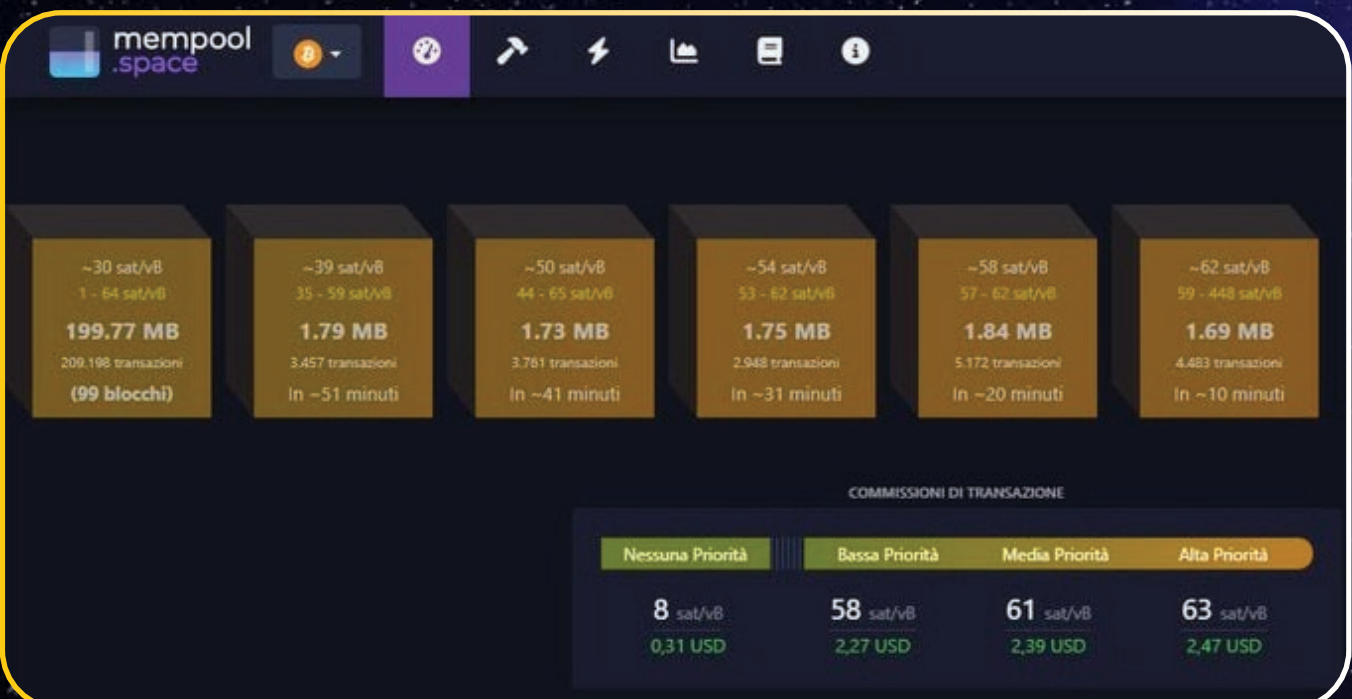

Ordinal theory does not require a sidechain or token aside from Bitcoin, and can be used without any changes to the Bitcoin network. Ordinal theory imbues satoshis with numismatic value, allowing them to be collected and traded as curios.

Individual satoshis can be inscribed with arbitrary content, creating unique Bitcoin-native digital artifacts that can be held in Bitcoin wallets and transferred using Bitcoin transactions. Inscriptions are as durable, immutable, secure, and decentralized as Bitcoin itself.

Why are HASCs very rare?

In addition to having a limited number, the collection was created by SFY Labs in the first few weeks of the ordinals theory being published. The first HASCs therefore have a very low ordinal number and are part of an elite group that over time will increasingly increase its importance as the number of total artifacts created on the Bitcoin network increases.

HASC were uploaded to the bitcoin mempool with a resolution, the SFY team faced very high mint costs. Considering that the SAT/vB will only increase with the greater use of the Bitcoin network, how much will the space used to mine the NFT be worth in the future? A truly exciting experiment.
