DumpsCafe

Topic 2, Contoso, Ltd

Overview

Contoso, Ltd is a consulting company that has a main office in Montreal offices in London and Seattle.

Contoso has a partnership with a company named Fabrikam, Inc Fabricam has an Azure Active Directory (Azure AD) tenant named fabrikam.com.

Existing Environment

The on-premises network of Contoso contains an Active Directory domain named contos.com. The domain contains an organizational unit (OU) named Contoso_Resources. The Contoso_Resources OU contains all users and computers.

The Contoso.com Active Directory domain contains the users shown in the following table.

Name	Office	Department
Admin1	Montreal	Helpdesk
User1	Montreal	HR
User2	Montreal	HR
User3	Montreal	HR
Admin2	London	Helpdesk
User4	London	Finance
User5	London	Sales
User6	London	Sales
Admin3	Seattle	Helpdesk
User7	Seattle	Sales
User8	Seattle	Sales
User9	Seattle	Sales

Microsoft 365/Azure Environment

Contoso has an Azure AD tenant named Contoso.com that has the following associated licenses:

- ➔ Microsoft Office 365 Enterprise E5
- ➔ Enterprise Mobility + Security
- ➔ Windows 10 Enterprise E5
- ➔ Project Plan 3

Azure AD Connect is configured between azure AD and Active Directory Domain Serverless (AD DS). Only the Contoso Resources OU is synced.

Helpdesk administrators routinely use the Microsoft 365 admin center to manage user settings.

User administrators currently use the Microsoft 365 admin center to manually assign licenses, All user have all licenses assigned besides following exception:

The users in the London office have the Microsoft 365 admin center to manually assign licenses. All user have licenses assigned besides the following exceptions:

- ➔ The users in the London office have the Microsoft 365 Phone System License unassigned.
- ➔ The users in the Seattle office have the Yammer Enterprise License unassigned.

Security defaults are disabled for Contoso.com.

Contoso uses Azure AD Privileged identity Management (PIM) to project administrator roles.

Problem Statements

Contoso identifies the following issues:

- Currently, all the helpdesk administrators can manage user licenses throughout the entire Microsoft 365 tenant.
- The user administrators report that it is tedious to manually configure the different license requirements for each Contoso office.
- The helpdesk administrators spend too much time provisioning internal and guest access to the required Microsoft 365 services and apps.
- Currently, the helpdesk administrators can perform tasks by using the: User administrator role without justification or approval.
- When the Logs node is selected in Azure AD, an error message appears stating that Log Analytics integration is not enabled.

Planned Changes

Contoso plans to implement the following changes.

Implement self-service password reset (SSPR). Analyze Azure audit activity logs by using Azure Monitor-Simplify license allocation for new users added to the tenant. Collaborate with the users at Fabrikam on a joint marketing campaign. Configure the User administrator role to require justification and approval to activate.

Implement a custom line-of-business Azure web app named App1. App1 will be accessible from the internet and authenticated by using Azure AD accounts.

For new users in the marketing department, implement an automated approval workflow to provide access to a Microsoft SharePoint Online site, group, and app.

Contoso plans to acquire a company named Corporation. One hundred new A Datum users will be created in an Active Directory OU named Adatum. The users will be located in London and Seattle.

Technical Requirements

Contoso identifies the following technical requirements:

- AH users must be synced from AD DS to the contoso.com Azure AD tenant.
- App1 must have a redirect URI pointed to https://contoso.com/auth-response.
- License allocation for new users must be assigned automatically based on the location of the user.
- Fabrikam users must have access to the marketing department's SharePoint site for a maximum of 90 days.
- Administrative actions performed in Azure AD must be audited. Audit logs must be retained for one year.
- The helpdesk administrators must be able to manage licenses for only the users in their respective office.
- Users must be forced to change their password if there is a probability that the users' identity was compromised.

Question #:1 - (Exam Topic 2)

You need to meet the technical requirements for the probability that user identities were compromised.

What should the users do first, and what should you configure? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

The users must first:

- Provide consent for any app to access the data of Contoso.
- Register for multi-factor authentication (MFA).
- Register for self-service password reset (SSPR).

You must configure:

- A sign-in risk policy
- A user risk policy
- An Azure AD Password Protection policy

Answer:

Answer Area

The users must first:

- Provide consent for any app to access the data of Contoso.
- Register for multi-factor authentication (MFA).
- Register for self-service password reset (SSPR).

You must configure:

- A sign-in risk policy
- A user risk policy
- An Azure AD Password Protection policy

Question #:2 - (Exam Topic 2)

You need to locate licenses to the A. Datum users. The solution must need the technical requirements.

Which type of object should you create?

- A. A Dynamo User security group
- B. An OU
- C. A distribution group

D. An administrative unit

Answer: A

Question #:3 - (Exam Topic 2)

You need to meet the technical requirements for license management by the helpdesk administrators.

What should you create first, and which tool should you use? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

Object to create for each branch office:

- An administrative unit
- A custom role
- A Dynamic User security group
- An OU

Tool to use:

- Azure Active Directory admin center
- Active Directory Administrative Center
- Active Directory module for Windows PowerShell
- Microsoft 365 admin center

Answer:

Answer Area

Object to create for each branch office:

- An administrative unit
- A custom role
- A Dynamic User security group
- An OU

Tool to use:

- Azure Active Directory admin center
- Active Directory Administrative Center
- Active Directory module for Windows PowerShell
- Microsoft 365 admin center

Question #:4 - (Exam Topic 2)

You need to meet the planned changes for the User administrator role.

What should you do?

- A. Create an access review.
- B. Modify Role settings
- C. Create an administrator unit.
- D. Modify Active Assignments.

Answer: D

Topic 3, Misc. Questions

Question #:5 - (Exam Topic 3)

Your company requires that users request access before they can access corporate applications.

You register a new enterprise application named MyApp1 in Azure Active Directory (Azure AD) and configure single sign-on (SSO) for MyApp1.

Which settings should you configure next for MyApp1?

- A. Self-service
- B. Provisioning
- C. Roles and administrators
- D. Application proxy

Answer: C

Question #:6 - (Exam Topic 3)

You have a Microsoft 365 E5 tenant.

You purchase a cloud app named App1.

You need to enable real-time session-level monitoring of App1 by using Microsoft Cloud app Security.

Which four actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

The screenshot shows a drag-and-drop interface with two columns: 'Actions' and 'Answer Area'. The 'Actions' list contains the following items:

- From Microsoft Cloud App Security, create a session policy.
- Create a conditional access policy that has session controls configured.
- Publish App1 in Azure Active Directory (Azure AD).
- Implement Azure AD Application Proxy.
- From Microsoft Cloud App Security, modify the Connected apps settings for App1.

The 'Answer Area' is currently empty. Four arrows indicate the correct sequence of actions to be moved to the Answer Area:

- From Microsoft Cloud App Security, create a session policy.
- Create a conditional access policy that has session controls configured.
- From Microsoft Cloud App Security, modify the Connected apps settings for App1.
- Implement Azure AD Application Proxy.

Answer:

Question #:7 - (Exam Topic 3)

You have an Azure Active Directory (Azure AD) tenant that has Security defaults disabled.

You are creating a conditional access policy as shown in the following exhibit.

Use the drop-down means to select the answer choice that completes each stamen based on the information presented in the graphic.

NOTE: Each correct selection is worth one point.

Answer Area

To ensure that User1 is prompted for multi-factor authentication (MFA) when accessing cloud apps, you must configure the [answer choice].

- Conditions settings
- Enable policy setting
- Grant settings
- Sessions settings
- Users and groups setting

To ensure that User1 is prompted for authentication every eight hours, you must configure the [answer choice].

- Conditions settings
- Enable policy setting
- Grant settings
- Sessions settings
- Users and groups setting

Answer:

Answer Area

To ensure that User1 is prompted for multi-factor authentication (MFA) when accessing cloud apps, you must configure the [answer choice].

- Conditions settings
- Enable policy setting
- Grant settings
- Sessions settings
- Users and groups setting

To ensure that User1 is prompted for authentication every eight hours, you must configure the [answer choice].

- Conditions settings
- Enable policy setting
- Grant settings
- Sessions settings
- Users and groups setting

Question #:8 - (Exam Topic 3)

You have an Azure Active Directory (Azure AD) tenant that contains three users named User1, User1, and User3,

You create a group named Group1. You add User2 and User3 to Group1.

You configure a role in Azure AD Privileged identity Management (PIM) as shown in the application administrator exhibit. (Click the application Administrator tab.)

Role setting details - Application Administrator

Privileged Identity Management | Azure AD roles

[Edit](#)

Activation

Setting	State
Activation maximum duration (hours)	5 hour(s)
Require justification on activation	Yes
Require ticket information on activation	No
Require approval to activate	Yes
Approvers	0 Member(s), 1 Group

Assignment

Setting	State
Allow permanent eligible assignment	No
Expire eligible assignments after	3 month(s)
Allow permanent active assignment	No
Expire active assignments after	1 month(s)
Require Azure Multi-Factor Authentication on acti...	No
Require justification on active assignment	Yes

Group1 is configured as the approver for the application administrator role.

You configure User2 to be eligible for the application administrator role.

For User1, you add an assignment to the Application administrator role as shown in the Assignment exhibit. (Click Assignment tab)

Answer Area	Statements	Yes	No
	User1 is assigned the Application administrator role automatically.	<input checked="" type="radio"/>	<input type="radio"/>
	When User2 requests to be assigned the Application administrator role, only User3 can approve the request.	<input checked="" type="radio"/>	<input type="radio"/>
	If a request by User1 to be assigned the Application administrator role is approved on January 31, 2021, at 23:00, User1 can use the role until February 1, 2021, at 04:00.	<input type="radio"/>	<input checked="" type="radio"/>

Topic 1, Litware, Inc

Overview

Litware, Inc. is a pharmaceutical company that has a subsidiary named fabrikam, inc

Litware has offices in Boston and Seattle, but has employees located across the United States. Employees connect remotely to either office by using a VPN connection.

Identity Environment

The network contains an Active Directory forest named litware.com that is linked to an Azure Active Directory (Azure AD) tenant named litware.com. Azure AD Connect uses pass-through authentication and has password hash synchronization disabled.

Litware.com contains a user named User1 who oversees all application development. Litware implements Azure AD Application Proxy.

Fabrikam has an Azure AD tenant named fabrikam.com. The users at Fabrikam access the resources in litware.com by using guest accounts in the litware.com tenant.

Cloud Environment

All the users at Litware have Microsoft 365 Enterprise E5 licenses. All the built-in anomaly detection policies in Microsoft Cloud App Security are enabled.

Litware has an Azure subscription associated to the litware.com Azure AD tenant. The subscription contains an Azure Sentinel instance that uses the Azure Active Directory connector and the Office 365 connector. Azure Sentinel currently collects the Azure AD sign-ins logs and audit logs.

On-premises Environment

The on-premises network contains the servers shown in the following table.

Name	Operating system	Office	Description
DC1	Windows Server 2019	Boston	Domain controller for litware.com
SERVER1	Windows Server 2019	Boston	Member server in litware.com that runs the Azure AD Application Proxy connector
SERVER2	Windows Server 2019	Boston	Member server that uses Azure AD Connect

Both Litware offices connect directly to the internet. Both offices connect to virtual networks in the Azure subscription by using a site-to-site VPN connection. All on-premises domain controllers are prevented from accessing the internet.

Delegation Requirements

Litware identifies the following delegation requirements:

- * Delegate the management of privileged roles by using Azure AD Privileged Identity Management (PIM).
- * Prevent nonprivileged users from registering applications in the litware.com Azure AD tenant.
- * Use custom catalogs and custom programs for Identity Governance.
- * Ensure that User1 can create enterprise applications in Azure AD. Use the principle of least privilege.

Licensing Requirements

Litware recently added a custom user attribute named LWLicenses to the litware.com Active Directory forest. Litware wants to manage the assignment of Azure AD licenses by modifying the value of the LWLicenses attribute. Users who have the appropriate value for LWLicenses must be added automatically to Microsoft 365 group that he appropriate license assigned.

Management Requirement

Litware wants to create a group named LWGroup1 will contain all the Azure AD user accounts for Litware but exclude all the Azure AD guest accounts.

Authentication Requirements

Litware identifies the following authentication requirements:

- Implement multi-factor authentication (MFA) for all Litware users.
- Exempt users from using MFA to authenticate to Azure AD from the Boston office of Litware.
- Implement a banned password list for the litware.com forest.
- Enforce MFA when accessing on-premises applications.
- Automatically detect and remediate externally leaked credentials

Access Requirements

Litware wants to create a group named LWGroup1 that will contain all the Azure AD user accounts for Litware but exclude all the Azure AD guest accounts.

Monitoring Requirements

Litware wants to use the Fusion rule in Azure Sentinel to detect multi-staged that include a combination of suspicious Azure AD sign-ins followed by anomalous Microsoft Office 365 activity.

Question #:9 - ([Exam Topic 1](#))

You need to meet the authentication requirements for leaked credentials.

What should you do?

- A. Enable federation with PingFederate in Azure AD Connect.
- B. Configure Azure AD Password Protection.
- C. Enable password hash synchronization in Azure AD Connect.
- D. Configure an authentication method policy in Azure AD.

Answer: C

Question #:10 - ([Exam Topic 1](#))

You need to implement password restrictions to meet the authentication requirements.

You install the Azure AD password Protection DC agent on DC1.

What should you do next? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

Configure the Azure AD Password Protection proxy service on:

<input type="checkbox"/>	DC1
<input type="checkbox"/>	SERVER1
<input type="checkbox"/>	SERVER2

Configure the password list:

<input type="checkbox"/>	In Azure AD
<input type="checkbox"/>	On DC1
<input type="checkbox"/>	On SERVER1
<input type="checkbox"/>	On SERVER2

Answer:

Answer Area

Configure the Azure AD Password Protection proxy service on:

<input checked="" type="checkbox"/>	DC1
<input checked="" type="checkbox"/>	SERVER1
<input type="checkbox"/>	SERVER2

Configure the password list:

<input checked="" type="checkbox"/>	In Azure AD
<input checked="" type="checkbox"/>	On DC1
<input type="checkbox"/>	On SERVER1
<input type="checkbox"/>	On SERVER2

About dumpsafe.com

dumpsafe.com was founded in 2007. We provide latest & high quality IT / Business Certification Training Exam Questions, Study Guides, Practice Tests.

We help you pass any IT / Business Certification Exams with 100% Pass Guaranteed or Full Refund. Especially Cisco, CompTIA, Citrix, EMC, HP, Oracle, VMware, Juniper, Check Point, LPI, Nortel, EXIN and so on.
