

A must-see!

Glow Worm Tours on Tamborine Mountain offers a rare opportunity in Queensland to see the magic of Glow Worms during daylight hours. Our caves are open rain or shine, all year round so there's always an opportunity to see our Glow Worms.

Glow Worms are members of the insect class and produce one of nature's most impressive bioluminescent light displays.

During our 30-minute tours, one of our highly qualified guides will lead you on a short walk through the rainforest into our purpose-built and world-first cave system.

Here you will experience the spectacle of thousands of twinkling glow worms, learn about their behaviour and biology, and even meet a Glow Worm up close.

The cave is easily accessible and is suitable for all ages!

Glow Worm Tours Tamborine Mountain

Daytime and Twilight Tours

A ground-breaking conservation initiative

Glow Worms require a permanently moist habitat and are dependent on rainforests and wet caves for their continued survival.

Unfortunately, these rare habitats are disappearing. By viewing the protected colony within the cave, you will be supporting a long-term conservation program, to reduce the negative impacts on our rainforests and wild Glow Worm colonies.

Also Available:

- Frog Hollow – local frog and insect display
- Café / Take-away
