The recommended starting dose of Testosterone Gel, 1.62% is 40.5 mg of testosterone (2 pump actuations) applied topically once daily in the morning to the shoulders and upper arms. The dose can be adjusted between a minimum of 20.25 mg of testosterone (1 pump actuation) and a maximum of 81 mg of testosterone (4 pump actuations). After putting testosterone gel on, you will need to wait some time before you bathe, shower, or swim. Be sure you know how long you need to wait. Read the package insert for more details. Let dry before covering with clothing. Avoid fire, flames, or smoking until dry. Put on clean, dry, healthy skin. ... Hey guys so this is my Dad, he died in his 40s to a preventable

treatable disease now a days known as HIV/AIDS. He was a Gangster Disciple (or for white people a gang member of the Crips in Chicago -- though not at all that)

I will break  
your fucking face 🤬😭

Med. Che

Overview Testosterone gel is one of several forms of testosterone medication used to treat hypogonadism in men. Hypogonadism is an abnormally low level of testosterone caused by certain medical... Testosterone gel (Androgel) is a gel containing testosterone and is prescribed for the treatment of low testosterone levels. Side effects, drug interactions, and patient safety information should be reviewed prior to taking this medication.
