

# World Of Warcraft VPNs For Speed & Unblocking

Are you blocked out of World of Warcraft (WoW) because of where you live? Maybe you aren't blocked, but your connection lags or your server goes down frequently. If so, a WoW VPN could be the solution to your problem. In this guide, we show you the best VPNs to use with World of Warcraft and why.

The best WoW VPNs at a glance

Here is a quick look at the best VPNs for WoW. For more information check out our in-depth list below.

Using a VPN with WoW can let you log in as if you are somewhere that it's blocked, like school WiFi, or connect to a more reliable server for speed and stability. In all about wow private servers , a VPN can even reduce the lag in your connection by routing your connection better than your ISP does.

We've tested VPNs from over 150 companies in the last five years. And we've scoured the market looking for the services with the best features for WoW players.

Each of these VPNs has made it onto our list because it has:

- Great speeds
- Plenty of servers to choose from
- Strong encryption
- Privacy features

So, now you know what we're looking for let's take a closer look at our top World of Warcraft VPN recommendations.

## Best World of Warcraft VPNs | In-depth Analysis

### 1. ExpressVPN

[www.expressvpn.com](http://www.expressvpn.com)

ExpressVPN is the best VPN for WoW. It offers a super-fast network of servers with optimized routing, as well as solid encryption and useful privacy features.

- 12 months + 3 months FREE + Backblaze backup: \$6.67/mth 49% OFF
- 6 months: \$9.99/mth
- 1 month: \$12.95/mth
- [www.expressvpn.com](http://www.expressvpn.com)

ExpressVPN is our #1 choice as best VPN for World of Warcraft. Its screaming-fast network and optimized routing combine to keep the ping rate as low as possible. With servers located in the countries where WoW realms are located, ExpressVPN can easily get you past country-specific blocks. And the service's strong encryption and built-in DDoS protection can shield you from whatever outside-the-game attacks might come your way.

Beyond its role as a WoW VPN, ExpressVPN makes a great general-purpose VPN as well. The service is incredibly easy to use and its overall performance is top-notch. With server locations in almost every major country, and impressive apps for Mac, Windows, Linux, iOS, and Android, it has covered wherever you need VPN protection. It even has VPN apps for routers, including Linksys WRT models and a wide range of ASUS RT series routers.

Located in the British Virgin Islands, the service is a top option for the privacy-minded. A wide range of payment options, and superb customer service round out their benefits. Try it risk-free with a 30-day money-back guarantee.

## 2. NordVPN

A fast VPN that is perfect for playing WoW and other online games

- 24 months: \$3.99/mth 67% OFF

- 12 months: \$4.99/mth 59% OFF

- 1 month: \$11.99/mth

- [www.nordvpn.com](http://www.nordvpn.com)

NordVPN is a VPN based in Panama with strong privacy features and apps for all platforms. It is a reliable service that is highly subscribed worldwide thanks to its advanced VPN features, and low prices. The VPN has servers in 59 countries which makes it great for unblocking geo-restricted or censored content. And those servers are super fast, which makes them ideal for playing WoW, streaming HD content, or torrenting.

We love that this VPN lets subscribers install and use the VPN on up to 5 devices simultaneously and that it has 24/7 live chat to help you when you most need it. A fantastic all-rounder that you can try with WoW yourself thanks to its 30-day money-back guarantee. Fast, cheap, reliable, and private - everything you need from a VPN!

## 3. Private Internet Access

Private Internet Access is one of the best WoW VPNs for privacy. It has proven its staunch

no logs policy in court and is packed with useful privacy and security features.

- 26 months + 2 months FREE: \$2.19/mth 82% OFF

- 12 months: \$3.33/mth 72% OFF

- 1 month: \$11.95/mth

- [www.privateinternetaccess.com](http://www.privateinternetaccess.com)

Private Internet Access (PIA) is a US VPN provider that keeps zero logs, a claim it has proven in court on multiple occasions. The VPN was recently acquired by Kape Technologies - a cybersec firm based in London whose primary aim is to help consumers gain protection online. PIA VPN has servers in 48 countries, it provides strong OpenVPN encryption, and is one of the most popular VPN services among Reddit users. It also has live chat support and access to Netflix US.

On top of world-class security, PIA also offers lightning-fast server speeds on a reliable network, ensuring your WoW gaming experience remains first-rate.

#### 4. Surfshark

Surfshark is the cheapest World of Warcraft VPN on our list. It's fast and fully featured making it great for users who want it for more than gaming.

- 24 months + 2 months FREE + Surfshark Antivirus: \$2.49/mth 81% OFF

- 24 months + 2 months FREE: \$2.49/mth 81% OFF

- 12 months: \$3.99/mth 70% OFF

- 1 month: \$12.95/mth

- [www.surfshark.com](http://www.surfshark.com)

Surfshark is a relatively young VPN company that has really hit the ground running. With super-fast servers, plenty of geolocations to choose from, and high functionality, it's a great service for users who want fast gaming and fast streaming. With its split tunneling functionality, users can unblock regional content abroad while still accessing local services.

What's more, users benefit from unlimited simultaneous connections, making it perfect for users who want to protect as many of their internet-connected devices as possible. Surfshark also comes with a kill switch for extra protection, making sure your internet disconnects if the VPN fails. Check out Surfshark for yourself with a 30-day money-back guarantee!

## 5. CyberGhost VPN

CyberGhost is value packed VPN for World of Warcraft. It's a fully-featured service that is highly functionality without the high prices.

- Pricing
- 36 months + 4 months FREE: \$2.23/mth 83% OFF
- 24 months + 2 months FREE: \$3.25/mth 75% OFF
- 6 months: \$6.39/mth 50% OFF
- 1 month: \$12.99/mth

Available on

- Windows
- macOS
- iOS
- Android
- Linux

Unblocks

- Netflix
- iPlayer
- Amazon Prime
- Hulu

Website

- [www.cyberghostvpn.com](http://www.cyberghostvpn.com)

CyberGhost is a fully-featured VPN service that keeps its prices low. With fast speeds and a global network of servers, CyberGhost is will be more than enough for most users. Its simple and easy-to-use app is great for beginners and gives lots of customizability over the VPN itself.

One feature we would like to see from CyberGhost is obfuscation (stealth) technology. This would give extra protection for users in countries with mass sureveillance (such as China). However, users can run TCP over Port 443 for increased privacy. With up to seven simultaneous connections, you can protect your entire household on a single subscription, and with a 45-day money-back you can try their service risk-free!

Why do I need to use a VPN for gaming?

The fastest VPNs for World of Warcraft

Lag in any game is unacceptable, which is why we only chose the fastest VPNs around when curating our list of best WoW VPNs. All have plenty of servers to choose from, too, allowing you to bypass blocks or better route your connection. To help you understand what sort of speeds you can expect from our recommended WoW VPN picks, we run daily speed tests on them and display the results for you to compare in the table below.

Place Provider Average Speed Max Speed Visit Site

1. NordVPN 63.61 Mbit/s 92.37 Mbit/s Visit Site
2. Surfshark 62.72 Mbit/s 85.40 Mbit/s Visit Site
3. ExpressVPN 57.03 Mbit/s 78.51 Mbit/s Visit Site
4. Private Internet Access 47.49 Mbit/s 73.24 Mbit/s Visit Site
5. CyberGhost VPN 38.08 Mbit/s 25.57 Mbit/s Visit Site

Will a VPN improve my WoW connection speeds

No, this is a common misconception about VPNs. In most cases, a VPN will actually slow down your connection. However, the ones we recommend have fast tier 1 servers, so the slow down of your connection speeds will not be noticeable.

The reason we say "in most cases" is because we have heard of reports that in some rare cases a VPN can help improve connection speeds. Often this is when your ISP is actively throttling your bandwidth when playing WoW. Some services also claim to be able to optimize the path that your packets take when connected to a WoW server too.

Why Do I need a WoW VPN?

Still not convinced? Below we look at some of the use cases why WoW players might want to consider investing in a VPN.

Unblocking World of Warcraft

There are several reasons why you might need a WoW VPN. People in some countries or regions (some Asian countries, Iran, and Crimea being examples) are blocked from connecting to WoW servers (realms). But, by using a VPN, you can make it look like you are connecting from a location that isn't blocked from connecting to those realms.

Sometimes you can run into problems, even if your part of the world isn't blocked. For example, you could find yourself in a hotel or other location that keeps programs from using certain communication ports for security purposes. If World of Warcraft needs those ports, you might as well be in a blocked country. Using a VPN allows you to bypass these problems altogether and enjoy gaming wherever you may be!

A more stable connection (sometimes)

Even if you're connecting to a realm without any problems, a WoW VPN can still have its benefits. Using a VPN can reduce lag and latency in-game (i.e. ping). While this is not a solution for every situation, a VPN can help you stabilize your connection and lets you connect to different regional servers. Connecting to a new server can help you find one that performs better (if you're experiencing issues with local servers).

Keep in mind that, since we're adding another step into your internet traffic, a VPN will inevitably slow down your connection to WoW. This can be for a number of reasons but is mainly because your traffic is being encrypted and routed through a server in a remote location. By choosing a VPN with fast servers, this impact becomes negligible.

Fortunately, the VPNs listed above give excellent server speeds, so you can minimize any impact to your gaming, and keep rest assured that your daily questing is protected by secure encryption.

DDoS protection

One final reason to use a WoW VPN is to protect yourself against hackers and angry gamers. Hackers are constantly trying to get control of World of Warcraft accounts and even snag credit card information. A VPN can keep these creeps at bay. In the world of esports, there are reports of gamers using DDoS attacks to cripple their opponents at crucial moments. Although we have not heard of similar attacks against World of Warcraft players, a VPN will protect you against such attacks if they are ever aimed in your direction.

Will I get banned for using a VPN with WoW?

No, there have been no cases (that we're aware of) of players being banned for connecting to a VPN while they are playing World of Warcraft. In fact, it was common practice to do so for Australian players before they got their own servers in order to improve their ping.

Now that we have covered all that you need to know about using a VPN with WoW, let's review our top picks.

1. ExpressVPN - The best VPN for WoW overall. It has a super-fast network of servers all over the world with optimized routing.
2. NordVPN - Lightning fast | Apps for all platforms | 24/7 live chat support

3. Private Internet Access - A secure VPN for WoW. It has a strict no logging policy & is packed with useful security features.
4. Surfshark - The cheapest WoW VPN on our list. Get speed and privacy from just \$1.99 per month.
5. CyberGhost VPN - A great value-for-money VPN for World of Warcraft. It's easy to use and has a decent network of fast servers.

## FAQs

If you're looking for more information about VPNs, check out this quick FAQ section before using our search bar to look for more in-depth articles.

What if I want a VPN for other games?

If you're looking for a generic PC gaming VPN, then there are plenty to choose from, but if you want more information, check out our guides for the following:

- VPN for Xbox
- How to set up a VPN on Xbox?
- VPN for PS4
- How to set up a VPN on PS4?
- Fastest VPN for Gaming

Will a VPN improve my internet speed?

A VPN can prevent bandwidth throttling (where your internet purposely slows your internet down), which will help you get the maximum speeds from your ISP. However, it cannot make your internet speed faster than what you are allowed by your ISP. If you pay for 80Mb/s, then a VPN won't increase that speed allowance.

Can a VPN help me get around being banned?

Most companies will ban a specific account or (if you've really ticked them off) an IP address. In the latter case, a VPN can help you get around an IP ban by providing you with a different, anonymous, IP address. Letting you get back to gaming without having to suffer the ban-hammer.
