LOOKING TO MOVE A HOT TUB?

**PURCHASED A SECOND-
HAND HOT TUB?**

**MOVING YOUR HOT TUB TO A
NEW HOUSE?**

**REMOVING AN OLD HOT TUB
YOU DON'T WANT?**

Relocating a hot tub is a job that needs specialist equipment and experience, along with quality public liability insurance to protect your property.

There's a few things to consider when deciding to move a hot tub, which we'll run through here...

How did it get installed?

If the hot tub was craned into the property, it may need to come out again that way. It may have come through an open fence panel, or prior to a gate being installed.

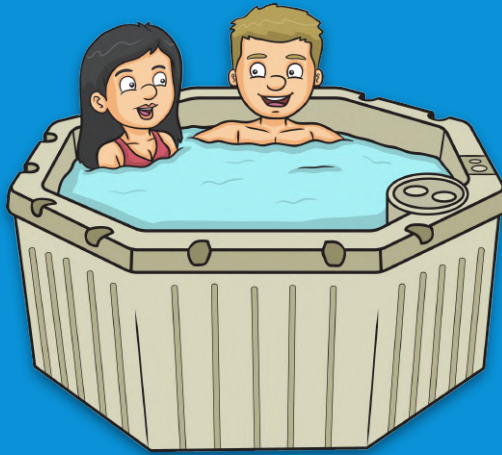

What does it weigh?

Bear in mind that a hot tub will likely weigh over 500kg, especially if there's still some residual water in the pipework. We will use our equipment to drain the spa completely before using our spa trolley to remove it safely and securely.

How will you protect it?

If you're moving a hot tub from one property to another, you want to make sure it gets there safely. The cabinet of your hot tub can easily be damaged - it can be very difficult and expensive to replace these panels.

Similarly, the shell of your spa is acrylic which can chip or be scratched - again a very costly repair.

WHAT WE DO

Thanks to over a decade in the industry, we know how to move hot tubs.

We deliver and install them for many retailers around the UK.

We estimate that we've moved **over 6000 hot tubs** in our time.

**You can't put a price on experience.
Actually, we can. We move spas from just £199.**

We use our specialist equipment to move hot tubs, including our spa trolleys, air wedges, water pumps and hot tub trailer.

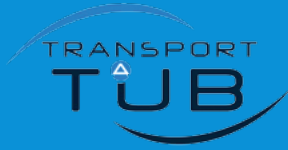

All fully insured and operated by our specially trained team.

When it arrives at its new destination, we can install and commission it for you so that it's ready for you to start using.

We also offer servicing and winter shutdowns.

MANY PEOPLE IMPERSONATE US.

WE ARE THE ORIGINAL TRANSPORT A TUB
