Summary Table

| <i>Criteria</i> | Supporting Features | Remarks and explanations |
|---|----------------------------|---------------------------------|
| Section 1194.21 Software Applications and Operating Systems | N/A | N/A |
| Section 1194.22 Web-based Internet Information and Applications | Supports | Review Details Below |
| Section 1194.23 Telecommunications Products | N/A | N/A |
| Section 1194.24 Video and Multi-media Products | N/A | N/A |
| Section 1194.25 Self-Contained, Closed Products | N/A | N/A |
| Section 1194.26 Desktop and Portable Computers | N/A | N/A |
| Section 1194.31 Functional Performance Criteria | Supports | Review Details Below |
| Section 1194.41 Information, Documentation and Support | Supports | Review Details Below |

Section 1194.22 Web-based Internet information and applications – Detail

| Criteria | Supporting Features | Remarks and explanations |
|--|----------------------------|--|
| (a) A text equivalent for every non-text element shall be provided (e.g., via "alt", "longdesc", or in element content). | Supports | Inclusite reads the alternative texts of any image or element when the coding exist in the Web Page. |
| (b) Equivalent alternatives for any multimedia presentation shall be synchronized with the presentation. | Supports | Inclusite provides alternatives to use any multimedia player for different types of disabilities. |
| (c) Web pages shall be designed so that all information conveyed with color is also available without color, for example from context or markup. | Supports | Inclusite provides functions to any web page so the user can choose how to be visualize the Web; being white/black one of the options, to be able to modify the contrast the second option, and to be able to change the sizes of the Web Screen the third option. |
| (d) Documents shall be organized so they are readable without requiring an associated style sheet. | Supports | Inclusite reads the Web document whether if it is done with style sheet or not. |
| (e) Redundant text links shall be provided for each active region of a server-side image map. | Supports | Inclusite provides options to the final user to be able to access images or maps. |
| (f) Client-side image maps shall be provided instead of server-side image maps except where the regions cannot be defined with an available geometric shape. | Supports | Inclusite supports both ways and offers access alternatives via its 6 interphases depending on the disability or special need. |
| (g) Row and column headers shall be identified for data tables. | Supports | Inclusite interacts with the HTML code to identify and read the headers, columns and the content of the data tables and providing this information to the user via its interphases. |
| (h) Markup shall be used to associate data cells and header cells for data tables that have two or more logical levels of row or column | Supports | Inclusite interacts with the HTML code to identify and read the headers, columns and the content of the data tables and providing this information to |

| | | |
|--|----------|---|
| headers. | | the user via its interphases. |
| (i) Frames shall be titled with text that facilitates frame identification and navigation | Supports | Inclusite interacts with the HTML code to identify and read the headers, columns and the content of the data tables and providing this information to the user via its interphases. |
| (j) Pages shall be designed to avoid causing the screen to flicker with a frequency greater than 2 Hz and lower than 55 Hz. | Supports | The Inclusite attributes are designed to comply. |
| (k) A text-only page, with equivalent information or functionality, shall be provided to make a web site comply with the provisions of this part, when compliance cannot be accomplished in any other way. The content of the text-only page shall be updated whenever the primary page changes. | Supports | Inclusite provides functionalities that allows the web to be 508 compatible. |
| (l) When pages utilize scripting languages to display content, or to create interface elements, the information provided by the script shall be identified with functional text that can be read by Assistive Technology. | Supports | Inclusite reads the alternative texts to the scrips. |
| (m) When a web page requires that an applet, plug-in or other application be present on the client system to interpret page content, the page must provide a link to a plug-in or applet that complies with §1194.21(a) through (l). | Supports | Inclusite reads the alternative texts to the applets or plug-ins. |
| (n) When electronic forms are designed to be completed on-line, the form shall allow people using Assistive Technology to access the information, field elements, and functionality required for completion and submission of the form, including all directions and cues. | Supports | Inclusite supports access to forms. |
| (o) A method shall be provided that | Supports | Inclusite allow quick and simple |

| | | |
|---|----------|---|
| permits users to skip repetitive navigation links. | | methods to access the web information. |
| (p) When a timed response is required, the user shall be alerted and given sufficient time to indicate more time is required. | Supports | Inclusite informs the user that there is a maximum waiting time and provides the option if the user requires more time. |
