

What Are the Benefits Of A Credit Card?

In Compare we talk about the benefits of a credit card and we give you all the information about the plastic you want to buy.

Knowing all the benefits of a platinum card brings many advantages for us. Giving it better use to balance our finances and get the best out of it within the possibilities offered by financial and commercial establishments is what we all expect from our plastic.

The benefits of a platinum card are many, from ease of purchase to accumulation of miles are some of those it has for you. Although in general the advantages are very similar, each company has loyalty strategies that seek the best for the customer.

At Compare We Want to Tell You, in Detail, the Benefits of a Credit Card:

1. One of the undeniable benefits of a platinum card is that, if you make good use of it and meet your payments on time, they help you to consolidate a good credit history and make your financial education evident . With all this you can easily access mortgage, personal and commercial loans. They talk about how you manage your personal finances.

2. Along the same lines, another benefit of a platinum card is that it allows us to have more control of our expenses than cash. As everything is systematized, there is always a record of what we spend, what we don't, and how far we can go , that is, the limit granted by the financial institution. If this record exists, it is easier to plan future payments and thus avoid getting into debt out of control.

3. Another interesting benefit of a platinum card is the possibility of living without cash in your pockets. There are many establishments in which transactions can be

made through this medium. We can also consider it safe, because if you are a victim of a robbery you can cancel it immediately before purchases are made from it.

4. They save your life in an emergency! If you have a purchase that cannot be postponed or you need something last minute, and you don't have money, the card is there for you. But beware! It is different to need to want. It is not the same that you have to make a purchase of a dress, because the one you have broke, to spend the entire quota of your plastic on clothes just on a whim. That's when you abuse your card and go into debt for no good reason.

5. It's easy! One of the main benefits of a platinum card is that over the years a very effective means of payment is consolidated, either online or in the physical environment.

6. You can divide your payment into installments! Other benefits of a platinum card is that after making purchases and cash withdrawals, you can choose in how many installments it is more convenient for you to make the payment. It is always recommended that you do it in the least possible so that you avoid paying higher interest.

7 International use! Although it has an extra cost, if you have one with international scope, it can make life easier for you abroad. With this payment method it is easier and faster to make transactions abroad and you can have cash anywhere in the world. You can also pay in your local currency when you are back in your country of origin.

Rewards! Other Benefits of a Credit Card

These benefits are reflected in your lifestyle and vary according to the type of card you have and the company that protects you, here in Compare we remind you of some:

* Discounts on cultural events (concerts, exhibitions, entertainment in general).

- * Offers in sporting events.
- * Promotions in clothing, cosmetics and food franchises.
- * Mileage Surrender
- * Accumulate points that can be exchanged in prize catalogs
- * Travel assistance
- * Protection insurance in purchases

It is important to remember that platinum cards are NOT extra money, they are a debt that you are acquiring. That's why at Compare we want to show you which is the best option for you.
