

# Avg Antivirus Software is better for Business?

[Avg.com/retail](http://Avg.com/retail) is a popular antivirus and anti-malware software for PC, Mac, Android, iOS and Windows Phone devices. AVG offers two antivirus options for single computers. AVG AntiVirus Free 2014 features antivirus (viruses, spyware and malware), link protection that scans for malicious content in links and File Shredder to securely delete private files. A paid version, AVG Internet Security 2014 (\$54.99 a year for one computer), includes advanced features, such as Online Shield to protect users from harmful downloads, Data Safe for file encryption and password-protection, and Anti-Spam and Firewall to combat hackers.

AVG also offers other antivirus software built especially for small businesses: AVG Antivirus Business Edition and AVG Internet Security Business Edition. Remote virus removal is also available.

Business Edition

# AVG Antivirus Business Edition

**AVG Antivirus Business Edition** is comprehensive antivirus software that protects PCs, laptops and servers. To protect PCs and laptops, this version uses Endpoint and Firewall Security to both fight viruses and block hacker access. It also uses File Server Security to go beyond computers and protect servers from attacks. Additionally, it offers Remote Endpoint Management, which allows users to administer the software within the network from a single location, as opposed to having to manage every single computer. AVG Antivirus Business Edition starts at \$89.99 for two computers for up to two years.

# AVG Internet Security Business Edition

**AVG Internet Security Business Edition is just like the Antivirus Business Edition, but also includes Email Server Security. This keeps emails secure by protecting servers and inboxes from viruses and malicious attacks. This version is currently available for \$94.49.**

# Remote Virus Removal

If you already have a virus, but don't have the time to fix it yourself, AVG offers a virus removal service that allows the company to access and clean up your system using a remote connection. AVG will also install AVG Internet Security for continuous protection. Remote virus removal costs \$129.99 and comes with a money-back guarantee.

# Antivirus support

No technology is perfect. As a small business, you need an antivirus vendor that will be there for you when something goes wrong and you need support.
