How to buy JACY on Uniswap

5. Confirm your swap! After this step you'll be required to confirm the gas fees with your wallet app

Important:

- Make sure you have the **correct** contract address for JACY;
- If you get stuck in the Confirm Swap screen, try raising your slippage in steps of 1%.
- Remove the old JACY (Jacywaya) from your token list to avoid the risk of buying the old contract. Our team IS NOT able to recover tokens and/or ETH applied towards the wrong contract address.
