Priority One

Visa® Fleet Functionality

Ensure confidence and increase control

The Priority One Card includes the flexibility of Visa Fleet functionality! Use it as a fleet management tool or as an extension of a purchasing or travel card program. With Priority One, you receive a wider acceptance footprint compared to other private label brands and the authorization controls that fleet operators need to manage fuel and other fleet-related expenses - easily and effectively.

Fleet Management

Purchasing

Travel

The Priority One Visa Fleet functionality can help your organization:

Take control

- With [more data](#) on individual vehicles as well as fleet-wide spend
- and the ability to [set spend and transaction limits](#), including types of purchases that can be made: fuel only, gas and maintenance or other business spending
- while [tracking spending at multiple levels](#) including employee, vehicle, fleet, expense type, merchant type and geography

Increase security

- With required ID numbers for card usage and [fuel theft prevention protocols](#), prompting drivers for ID and odometer reading at the pump
- plus an [automated way to monitor compliance](#) with spending policies

Drive efficiencies

- [Identify under-performing vehicles](#) using fuel type and quantity information, alongside rule infractions to track overall spending
- while taking advantage of gas locations that provide [enhanced fleet data](#) (i.e. miles-per-gallon calculations)
- and utilize [fleet-specific reporting](#) to manage every aspect of your vehicle fleet program
