the perfect model ship,
for you.

Premier Ship Models

Attention to detail

Taking a meticulous approach
and using real ship plans
to maintain precision,
and accuracy,
to create the most authentic
ship models

Our promise

Corporate Testimonials

Anton Pihl, UK

Dear all at Premier Ship Models, The two ship models arrived safely in the new Danish Maritime Museum last week and yesterday they were both installed in their showcases in the exhibition area. It looks really nice. The exhibition opens this Saturday with a reception for 500 people, and H.M. the Queen of Denmark will be sitting right next to your ship models. Thank you so much for your work.

Mikko Kunas, Finland

The ship models are exceptional, everyone just loves them, floating in the air.

Merima (Finnish company)

Marine Interior Solutions commissioned twenty ship models at 1.5 mt long each, to be hung from the ceiling of a new Cruise Liner 'Miracle' for the Caribbean Cruise Line company. Merima Ltd

Clive Miners, Hong Kong

We first commissioned Premier Ship Models in early 2004 for a very urgent delivery on custom making ship models of the Batavia and San Felipe Galleons. This then increased to additional orders for a further two model historical model ships of the Borobodur and Perahu vessels and lastly, late in 2004, a Singalese model sailing boat.

They worked very professionally and did significant research on the later commissioned model ships as our client had little information on these historical ships.

Constant delays and our clients change of mind on needs, finishing, ageing of the model ships etc. added complexities to already difficult tasks, but in the end we received on time very excellent wooden ship models, highly detailed and fine finishing.

Chris Kastella, Denmark

Thanks for the opportunity to work with you and Premier Ship Models on Tidewater's model projects! With one model project complete and another to be delivered in approximately 2 months, I can confidently say that

Tidewater has been very satisfied with the Premier products

Throughout the process though Premier has been responsive to Tidewater's needs, engaged in continual communication throughout the model build process.

Kevin Philips, Europe

Many thanks for your help with the Santa Maria Model. We successfully completed filming on Saturday, with the ship model being one of the last things that was shot on. It looked very good on camera, I worked with a local model maker and painter to give the ship a patina of having been used and at sea of many years. All worked well. The ship is now being sent to the Advertising Agency in New York, so that it can be made available to the visual effects company if they need it during the Post Production process! Some Air miles It will have collected over the past few weeks.

Many thanks to your team, Best wishes.
