The Tropical Secret For Healthy Weight Loss

Support healthy weight loss with Exipure's proprietary blend of 8 exotic nutrients and plants backed by clinical research.

April 2022 - New Scientific Discovery

Scientists Discover The Real Root-Cause Of Your Belly Fat

(Hint Not Diet or Exercise)

Are you struggling to lose weight no matter how much you diet or exercise? Turns out, **it's not your fault.**

A 2022 study published in Nature Medicine of 52,000 women and men, the largest of its kind in humans, found just one common factor in every overweight man and woman. **Low brown adipose tissue levels!** They also found common in every skinny person were high brown adipose tissue levels.¹

Brown adipose tissue (BAT) also know as brown fat, is not fat at all. Its not a fat storer but a **fat shrinker**. Its brown color comes from its densely packed mitochondria which work 24/7 to **burn calories** from your fat stores and the food you eat into pure, natural energy.

Even though BAT makes up a fraction of your weight, it can burn up to **300 times** more calories than any other cell in your body!²
