

Tips On How To Download And Set Up Minecraft Maps

Enjoying Minecraft is a unbelievable solution to explore your creativity. However after some time, the sport can begin to really feel a little bit stale.

A method that gamers resolve this problem is by installing new Minecraft maps. These maps are simple to seek out, they usually make playing Minecraft really feel fresh again.

This information will show you one of the best locations to download Minecraft maps and how to install them.

What Are Minecraft Maps?

Minecraft maps are mainly the identical as Minecraft worlds: custom digital environments made by in-recreation gamers. These maps might be anything from a pixel-artwork statue to a parkour challenge. They can even take the type of an entire city.

And once players create a brand new Minecraft map, they'll share their creation with the neighborhood. In addition, importing these maps allows customers to explore the designs of different neighborhood members.

How you can Download Minecraft Maps

First, you may need to determine which version of Minecraft you've gotten. Java maps won't load on Bedrock versions of the software and vice versa. As soon as you've got verified your version, you can obtain maps from the web sites listed under. Maps also are available one in every of two file codecs: .zip or .mcworld.

- .zip file: .zip information are used to share maps created within the Java edition of Minecraft. The .zip file incorporates the assets related to loading the map in-sport. Bedrock editions of the game (Windows 10, iOS, Android) additionally formerly used .zip files. An excellent source for these maps is the Minecraft Maps webpage.
- .mcworld file: The .mcworld extension stores all map-associated property in a single file. To put in a .mcworld map, double-click it. You will discover .mcworld maps on the MCPEDL fan site, together with skins, seeds, texture packs, and mods specifically for Minecraft.

Now that you have downloaded your new maps, it is time to put in them.

How to put in Minecraft Maps on Home windows (Java)

To make use of your new map file, you'll need to put it in the proper directory. The location will range based mostly on your Minecraft version. For the Home windows Java model:

1. Extract the .zip file you've got downloaded.
2. Copy the map folder by highlighting it and urgent Ctrl + C on your keyboard.

3. In your keyboard, press Win + R to open the Windows Run app.
4. In the textual content box, sort %appdata%. Then, press Enter to open the C:\Customers\yourusername\AppData\Roaming directory.
5. In the Roaming listing, discover the folder labeled .minecraft. Inside, Minecraftservers may find a folder labeled saves. This folder is the place Minecraft shops its maps.
6. Open the saves folder and paste the map folder inside. That's it!

Alternate Technique

If you want to keep away from utilizing the Run app, you may as well access the Minecraft saves folder via the Minecraft Launcher. This is how: First, copy the map folder as earlier than.

1. Open Minecraft Launcher.
2. Beneath Minecraft: Java Edition, click the Installations tab.
3. Hover over Newest Launch and click the folder icon to open the Minecraft set up listing.
4. Navigate to the saves folder.
5. Paste the map folder.

To discover your downloaded world, launch Minecraft in single-player mode. You need to see your map. Click the map to load it. Once every thing hundreds, begin exploring!

How to put in Minecraft Maps on Home windows 10 (Bedrock)

You may easily install custom maps on all Bedrock editions of Minecraft by using .mcworld archives. Double-click the .mcworld file to open Minecraft with the new map loaded.

For older information that use the .zip extension, you may need to extract them and manually transfer the contents to the minecraftWorlds folder.

1. Extract the downloaded zip file.
2. Copy the folder you simply unpacked.
3. Open File Explorer.
