

GLOBAL RESERVE COIN

WHITEPAPER

What is Global Reserve Coin?

Global Reserve Coin is a BEP-20 coin. \$GRC is the only cryptocurrency in the world that is backed up by real gold! In the times of uncertainty in the world, we need a currency which is secured by a real commodity. 2% of all transactions will be dedicated for purchasing gold, creating the real value of the token. You no longer are purchasing just air and numbers on your screen.

Official Website: <https://globalreservecoin.org>

Twitter: <https://twitter.com/grcgold>

Telegram Channel: <https://t.me/globalreservecoin>

DETAILS

Name: Global Reserve Coin

Symbol: GRC

Decimals: 9

Contract address:

0x8e4653Ef0f8Ce731653192bb642D5347Ccec2c6a

Total Supply:

100,000,000,000 (100 billion) \$GRC

Tax Rates: 10% buy and 12% sell:

3% or 4% Reward to Holders in BUSD

3% Marketing Fee

2% or 3% Automatic Liquidity

2% Purchasing Gold

There are no transaction fees between wallets!

✔ Contract is Verified on BSC Scan

TOKENOMICS

✔ Passive Income for \$GRC Holders (3% or 4%)

You no longer need to stack coins to get a passive income. For each transaction of \$GRC, the users will pay 3% tax which will be distributed to all users and paid in \$BUSD!!! Just for holding \$GRC in your wallet, you will accumulate \$BUSD. In the early stages, there will be a 4% sell tax to encourage people to hold. The short-term investors will increase the rewards for holders by selling \$GRC. Therefore, purchasing \$GRC early is a great investment!

✔ Automatic Liquidity (2% or 3%)

2% \$GRC transaction fee will be automatically dedicated to the liquidity pool. This mechanism ensures that the token has ever-increasing liquidity, making the currency stronger and increasing the price of \$GRC. Buy \$GRC early, accumulate passive income, wait for the price to go up and then sell at higher price! 3% tax for selling \$GRC. \$GRC is a great short-medium and long-term investment.

TOKENOMICS

✔ Buying Gold (2%)

2% \$GRC transaction fee will be dedicated to purchasing real gold. This gold will be at one of the most secure gold banks in the world. The gold will be purchased in Perth, Australia once a month. \$GRC will have a real ever-increasing value in gold. If something ever will happen to blockchain technology, the \$GRC holders can exchange \$GRC for gold. \$GRC is your security.

✔ Marketing fee (3%)

The marketing fee ensures that there is ongoing support for the project in terms of development. This mechanism will contribute to a global adoption of the coin, making the world fully decentralised. Mass adoption will generate more transactions increasing the value of \$GRC and passive income for holders.

REFLECTION MECHANISM

The reflection mechanism is decentralised and trustless as it's managed by a smart contract that automatically distributes tokens across the wallets of all holders, a liquidity pool, and a burn wallet. All that holders have to do is 'hold and earn', and ensure they manage their wallets carefully.

The whole process is transparent as every wallet that receives a part of the fee can be publicly audited on the blockchain.

The hold-and-earn functionality offers users the benefit to earn yield without having to stake their tokens, while addressing the issue of excessive price movements and selling pressure. Some more key issues it addresses are:

- No staking
- DeFi yield generation
- Security is ensured through the smart contract
- Fair distribution of earned tokens

REFLECTION MECHANISM

The mechanism of reflection tokens increases the number of ways investors can earn in DeFi as holders can earn rewards on their tokens while using it for staking and other ways of earning passive income.

- The yield-generating token distribution process is easy, secure and transparent via the usage of smart contracts. There's no central party or interface to claim fees as the whole process is automated.

- It can prevent the frequent occurrence of massive price dumps and whale manipulations in newer crypto projects to some degree.

- Reflection mechanisms produce automatic liquidity, hence reducing supply and increasing price valuation.

- The cryptocurrency market outlook can be quite volatile. When cryptocurrencies are experiencing a significant downward trend during a bear market (now!), reflection token holders have a clear advantage thanks to the passive hold and earn rewards.

HISTORY

Historically, the currencies were backed by gold. Today, USD is no longer backed by gold. The government can just print paper which is worthless. That's why USA has a \$33 trillion debt. The government is rich while the people are poor. People spend everyday working hard for USD paper. And the people on top just print that paper and you work hard to survive. It's just insane. We need to bring back secure currencies. That's why \$GRC is special. All the altcoins are losing value, because they have no value. \$GRC is here to bring sanity to the world and change the game!

GOLD

Buying \$GRC doesn't mean you are buying gold. We dedicate some funds to purchasing gold. This is done for three reasons:

1. If something ever happens to blockchain, **ONLY THEN** you can exchange coins for gold.
2. This is a security of a coin. We are now in bear market, so the price of the coin won't go down. When we hit next bear market, many coins will lose their value. Our coin is backed by gold. So the price of the coin is less likely to go down, as people will know that the coin is secure. If something ever happens, we have gold. Secure coin will continue to exist.
3. If the price ever drops too low and we would like to boost the coin price, we could consider selling off gold and buying \$GRC coins. This would be direct price intervention at the cost of developers. This is a safety option for dark times.

SALE BEGINS

1. **Gold-Backed Stability:** With \$GRC backed by real gold, you can be confident in your investment's long-term value and stability.
2. **Rewards in \$BUSD:** Earn passive income just by holding \$GRC! Enjoy regular rewards in \$BUSD, a stablecoin pegged to the US Dollar, ensuring consistent returns.
3. **Limited Supply:** The total supply of \$GRC is limited, which means the value will only increase as demand rises. Get in early to secure your share of this scarce asset!
4. **Early Adopter Advantage:** Be among the first to tap into the potential of \$GRC. Early investors will have the upper hand as new features are introduced and the project gains traction.
5. **Community and Network:** Join a growing community of like-minded investors and be part of an ecosystem that supports and benefits from the rise of \$GRC.

LOCKING 100%

We locked 100% of \$GRC liquidity in Pinksale Liquidity lock for 6 months. This is done for the security of the investors. We will consider further locking liquidity after 6 months. But you are 100% safe until then.

SCAM/FUD

I'm in charge of finance.

If we get whales and they dump the price, nothing I can do about it. It's an open market. But it happened so many times with other coins, even Bitcoin. So don't be surprised. But it isn't possible for me to rug pull you or scam, because all the coins are locked. And when they are unlocked, I will make sure it doesn't influence the price a lot. I won't put them into circulation straight away or sell them off at once. As I said we will aim to sell them to exchanges, so the price continues to go up.

I will try my best to manage the development of this project, especially the financial part. I'm here to help those who want to achieve financial freedom.

DOXXED TEAM

My name is Iaroslav Ignatenko.

I'm originally from Russia, but currently live in Tasmania, Australia.

I practice Counselling and Applied Psychology.

You will see me on Youtube @GlobalReserveCoin.

Below are links to my personal social networks.

I hope that you can put trust in me as I can put trust in you.

Telegram: @yarik0409

Instagram: @yaroslav_ignatenko96

DOXXED TEAM

GOLD will be purchased each month.

The date will not be set, as the short-term investors will try to take advantage of selling the tax tokens by me to purchase gold.

Gold will be purchased at Melbourne Mint:

<https://melbournemint.com.au>

This may be subject to change, as we try to find the best gold for the best price.

GOLD will be stored at my personal address. This is for security reasons. We don't trust banks and government institutions. They are using money, which are not backed by anything except trust. Therefore, these banks are failing.

ROADMAP

Phase 1

Marketing push to spread awareness
Website launch
5000 Telegram members
5000 Twitter followers
1000 Youtube Subscribers
Start purchasing GOLD
Global Reserve Coin is Launched!

Phase 2

Influencer marketing push
Listing on coin gecko
Listing on coin market cap
25,000 telegram members
25,000 holders
10,000 Youtube Subscribers
Third party audit

ROADMAP

Phase 3

100,000 holders

100,000 telegram members

100,000 Youtube Subscribers

Large influencer marketing push

Community Voting

Strong Community
