Security Duty stop all encrypted communication

Saturday, December 17, 2016

Encrypted communication means sharing metaphorical text, numeric messages, the civil movement, advertising and media networks dual meaning.

The reason is a massive security risk activity manipulation of the natural rhythm of our mathematical reality when using technology is the foundation skills of programming code physical reality in the manner of a quantum system.

Technology can make our misinformation and manipulative acts with the rhythm and with the results of world politics, state election, the economy and our relationship or other incidents and policies. Mean importance is start Legal communication and use private lines.

The existence of technologies is confirmed by actual evidence. Owner technology is confirmed, but the actor modification is not confirmed by the full meaning.

Actor modification may be subject unknown, beyond the range of publicly active groups on the political scene.

My current capabilities do not allow to find out accurate information. In the case of my freedom, I'm able to organize research to ensure the detection of all these activities and their origin since, for example, to "the beginning".

My personal sighted consequences resulting from the modification is decentralization, directed my interests, damage to physical objects, interactive response society, emotional manipulation, natural activities, control biorhythm, light health problems, spying on strongly criminal level, harming the ability of legal communications, control instruments native chance by intelligent string rhythm of reality as well and the function of economics and politics of many states.

It is necessary to use all available means to stop these acts.

Each format has the effect of owning a limit range. Space is without borders, the ability to plant an independent research and defensive zones. Position, activity and existence of these zones must be disclosed only in the period of the joint meeting between peaceful countries. Member of the division must not be in any contact "with our world." Zone can be detected only through advanced search technologies, even after several hundred to a thousand years in the future after the last function zones.

The same mathematical combinations are also being reflected in the sum of the date and time or metaphorical name to other disasters and people in our history, the people from the political ranks over the last several hundreds and thousands of years, and also Julius Galius César, but disasters like the explosion of Chernobyl nuclear plant, sinking of the nuclear submarine Kursk, earthquakes in many states, geographic shapes of continents, others more global statistics such as economic facts and states, for example, or other public incidents.

Therefore, it is confirmed that our whole world is under the occupation of espionage and terror from criminal actors who must be punished accountable, Now!

Above all, I point out that I am not a participant in this crime, and my interests are not abusing such technology for the purpose of terrorism. Let my identity reference to any form of connection with the crime, because I have always confirm that any of my interest is not meant to justice and legal interests. I do not have anything to do with any criminal or a person with terrorism.

Therefore, for my people centralization of these statistics, the main security strategies need to carry out my support for the isolation of people from areas of public space and the ability to provide a common development environment for private principles and without the possibility to be under the monitoring of such persons.

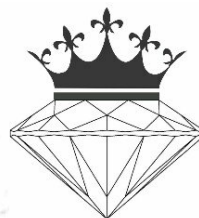

It should not be applied this effect to block development activities and the development of civilizations. Such a plan is a major act of terrorism which is a centralized against us. The development of our civilization is the main essence of power in the ability of our opposition to terrorism.

Therefore it can not be applied to any act of censorship prior to my person or my blocking legitimate interests.

Thank you for your time, we're all in the same situation and it is necessary to establish cooperation.
