PRESENTATION

WELCOME TO ESSENS

Let me introduce you to our new cosmetics catalogue, which will accompany us in the year of 2018. All of our products have been inspired by the latest world trends and have been created with the aim of achieving premium quality. I believe this catalogue will help you to maximise the utilisation of the benefits of ESSENS products and contribute to easing customer orientation of our rich offer. We place great emphasis on the care of all members of the ESSENS family, please do not hesitate to contact us at any time with complete confidence.

Michal Kovář

ESSENS WOMEN'S PERFUME

"What is that wonderful smell?" Simple words that invoke every woman with an uplift. Appropriately chosen perfume is an indispensable companion for any woman, it's a supplement to personality and highlights underlying magic and glamour. Nothing is ingrained into memory more than a pleasant scent. The goal of potentiating a woman's impression is not only that of the perfumer, but also that of ESSENS. This is the reason we are continually renewing our perfume portfolio, to keep up with current world trends and offer modern fragrances which are sure to dazzle every woman.

20% aromatic essence = elite among perfumes

ESSENS perfumes are primarily created with emphasis on the highest possible quality. Our production is certified by GMP (Good Manufacturing Practice), ISO 9001-2008 and fulfills the strictest rules and standards of the EU. We guarantee the content of 20% aromatic essence (essential oils), exclusively supplied by SEJUZ, one of the top world producers for perfume companies, which ensures rank amongst the elite of perfumes.

Let's imagine the most simple explanation of the production process

Essences of the highest quality are first mixed with pure perfume alcohol. Only distilled water is used to denature the perfumes so that the fragrance and the quality of the final product is not at all influenced. The resulting mixture is supercooled to a temperature of -7°C and is then perfectly filtered, with the use of a 10-micron mesh. For the components to be able to bind into a harmonic unit, the perfume matures for at least 8 weeks in stainless steel storage tanks. Our flacons, created by Italian masters, are cleaned by air and filled with these perfumes. The resulting products are packed into their boxes, which possess a design with the emphasis of purity. All production steps are under constant control of quality and only faultless materials are used for the production.

All of our products are certified and registered for sale in every country, where an ESSENS branch is established.

Top note

Very intense fragrance that is recognised immediately after application; this sensation lasts a few seconds, but in some perfumes this may even last up to 15 minutes.

Middle note

Fragrance that can be sensed after the unwinding of the top note, the intensity lasts roughly 2-3 hours.

Base note

In this phase, the fragrances are released slowly; the duration is extended for a few hours, sometimes even tens of hours.

Our fragrance, our representation...

One of the five human senses is smell. All that we smell is immediately transmitted to our brain where the olfactory organs are situated. This means pleasant and well-chosen fragrances are the first impression of our surroundings we receive.

The emotion that the perfume evokes plays the most important role for choosing your essence. Our type of skin, what we wear and even how we feel at that moment subsequently forms the final choice and fragrance that passes-by and people perceive. That is the reason why the same perfume smells differently for all of us.

Let's pay attention to choosing the right perfume. All fragrances that we wish to introduce are available in the form of small samples. Fragrant ingredients are gradually released for several hours and you have the unique opportunity to try the perfume and choose the best scents, crafted especially, for you. Every situation is an opportunity for another type of fragrance with different intensity. To school or to work we choose distinctively lighter fragrances which do not stir those around us, only those which compliment our personalities. On the contrary, evening company will appreciate a distinctive perfume that underlines charisma and charm.

The magic of lasting fragrance

- perfume works best where the skin is mostly perfused with blood. It is, therefore, applied behind ears, to the neck, wrists and elbows, but also to the ankles
- clothes should be put on after the skin has absorbed the perfume
- to make the fragrance last longer it is fitting to enhance it by using complimentary products of the same aroma
- for a lower intensity, it is enough to walk into a fragrance cloud, created by spraying perfume in front of yourself

Indicative fragrance division by the ratio of contained aromatic essence

15-40%
parfum is the highest quality and most intensive fragrance that can be purchased on the market, the proportion of fragrance is 15-40%

12-15%
EDP, or Eau de Parfum as it is known, contains 12-15% of fragrant essences

6-12%
EDT, Eau de Toilette, contains 6-12% of fragrant essences

4-6%
EDC, Eau de Cologne, known simply as Cologne, contains 4-6% of fragrant essences

1%
EDS, Eau de Solide, more commonly known as sports or splash perfume, contains 1% of fragrant essences

ESSENS UNIQUE

Pamper yourself, be swept off your feet and indulge yourself in an extraordinary fragrance. Due to the long-lasting maturation process, the carefully selected, natural ingredients, of the highest quality, are combined into an intimate and enchanting perfume composition. ESSENS Unique perfumes and their harmoniously blended tones are bound to amaze you. They are the personification of natural beauty, elegance and nobility whilst simultaneously emphasising the freedom and power to remain in forever ourselves.

COLOSTRUM

What is colostrum?

- Colostrum is the first milk produced by the mammary glands after mammal give birth. Contained within are all necessary, ready-made antibodies to protect against infection in the early weeks of life.
- Colostrum is valued for its high content of vitamins (A, D, E, C, B1, B2, B6, B12, folic acid, pantothenic acid, biotin, niacin), minerals, trace elements (sodium, potassium, calcium, phosphorus, magnesium, iron, iodine, chromium), proteins and protease inhibitors.
- Colostrum contains antibodies effective against bacteria, viruses and fungi.

Benefits of cosmetics contains ESSENS Colostrum

- ESSENS body and facial cosmetics, containing colostrum, have been created on the basis of the latest research, knowledge and trends within the field of premium cosmetics
- due to the effects of phospholipids (fats and organic acids), it is easier for the active substances contained within to penetrate the upper layer of skin. The subsequent formation of a lipid film, a thin layer which covers the skin, acts as a retardant against the evaporation of water from the skin
- the antibacterial and anti-inflammatory effects of lactoferrin and lactoperoxidase inhibit inflammation and skin irritation
- they contain naturally sourced, raw materials - of the highest possible quality
- the skin is protected from all-day exposure to adverse external influences
- are without parabens and loades, are non-toxic to the environment
- optimal for those with sensitive skin, are suitable for everyday use
- they help in the removal and treatment of skin defects and acne
- growth factors positively affect skin cell regeneration
- regenerating skin cells produces an anti-ageing effect
- the removal of wrinkles is accelerated

34

COLOSTRUM

ESSENS COLOSTRUM

+ VITAMIN D

- food supplement developed and manufactured under pharmaceutical supervision
- active ingredients - colostrum and vitamin D3
- high content of active ingredient IgG40 (400mg)
- supports natural immunity
- does not contain artificial colouring, sugar or gluten
- excellent tolerance in people with lactose intolerance
- there are no known negative effects whilst being taken with other food supplements or medication
- contains all the benefits of ESSENS Colostrum yet, with vitamin D, also:
- counteracts osteoporosis and the decalcification of the body
- helps to enhance strength of bones and teeth
- helps to reduce high blood pressure

VITAMIN D DEFICIENCY HAS BEEN ASSOCIATED WITH A WIDE RANGE OF DISEASES, SUCH AS RESPIRATORY INFECTION, OSTEOPOROSIS, TOOTH DECAY, HIGH BLOOD PRESSURE, HIGH BLOOD CHOLESTEROL, REDUCED PRODUCTION OF INSULIN, DEPRESSION, AUTOIMMUNE DISEASE AND MANY OTHERS.

ESSENS COLOSTRUM + CURCUMIN

- food supplement developed and manufactured under pharmaceutical supervision
- active ingredients - colostrum, extracts from long tumeric and black pepper
- high content of active ingredient IgG40 (100mg)
- supports natural immunity
- does not contain artificial colouring, sugar or gluten
- excellent tolerance in people with lactose intolerance
- there are no known negative effects whilst being taken with other food supplements or medication
- contains all the benefits of ESSENS Colostrum yet in combination with curcumin:
 - helps protect against cancer diseases
 - is a part of alternative therapy against cancerous diseases when combined with medical treatment
 - helps reduce the cancer cells' resistance against the effects of radiation during radiotherapy and helps to reduce the effects of cancerous growths

CURCUMIN EXTRACT IS DERIVED FROM TUMERIC (CURCUMA LONGA), WHICH HAS POWERFUL ANTIOXIDANT AND ANTI-INFLAMMATORY EFFECTS AND IS, THEREFORE, VERY OFTEN USED AS AN ALTERNATIVE TREATMENT OF CANCER. PIPERINE IS AN EXTRACT FROM PEPPERCORN WHICH CONTRIBUTES TO BLOOD CIRCULATION OF THE MUCOUS MEMBRANES AND INCREASES, UP TO TWENTY TIMES HIGHER, THE EFFICIENCY OF CURCUMIN.

Aloe Vera Barbadosis Miller

(True aloe) may grow up to 100cm tall and is a succulent perennial herb with a short stem and a rosette of sparsely growing, spiny leaves. Plant origin is mostly attributed to the Nile basin, but is now cultivated in climatically conforming regions around the world. The pulp of the leaves is formed by colourless cells with a gel-like content that has clinically proven health benefits and is therefore used as a food supplement and has now found its place in the cosmetics industry.

Aloe Vera Gel contains amino acids, vitamins, minerals, enzymes, polysaccharides and many other beneficial substances.

Benefits of cosmetics containing aloe vera

- they have been created on the basis of the latest research, knowledge and trends
- are without parabens and loadeners, are non-toxic to the environment
- suitable for everyday use and optimal for those with sensitive skin and susceptible to acne, herpes, eczema or fungal infections
- aloe vera helps to reduce bacterial growth and is highly valued for both its antibacterial and anti-inflammatory effects
- aloe vera is easily absorbed deep below the surface of the skin and stimulates fibroblasts (basic cells of connective tissue found within different parts of the human body) resulting in the accelerated recovery of cells

THE GROWING, PRODUCTION PROCESSES AND RESULTING RAW MATERIALS ARE DOCUMENTED BY GLOBALLY RECOGNISED CERTIFICATES OF QUALITY

Aloe Vera Barbadosis Miller

(True aloe) may grow up to 100cm tall and is a succulent perennial herb with a short stem and a rosette of sparsely growing, spiny leaves. Plant origin is mostly attributed to the Nile basin, but is now cultivated in climatically conforming regions around the world. The pulp of the leaves is formed by colourless cells with a gel-like content that has clinically proven health benefits and is therefore used as a food supplement and has now found its place in the cosmetics industry.

Aloe Vera Gel contains amino acids, vitamins, minerals, enzymes, polysaccharides and many other beneficial substances. The values of these substances are not constant and vary, depending mainly on the growth conditions. On these grounds, ESSENS products are made exclusively from the Aloe Vera Barbadosis Miller and grown in the BIO quality of the natural environment and non-contaminated areas of Jaumave, Mexico. The plants are watered only by rain or spring water from the mountains without the use of fertilizers, insecticides or herbicides. They are not genetically modified.

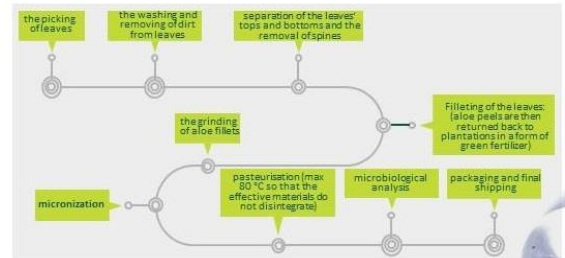

The Totaloe process - this revolutionary way of processing aloe vera maintains preservation of 200 active materials and more than 75 different nutrients. It combines traditional manual processes with additional phases ensuring the perfect quality of processed gel.

Micronization - one of the ways to increase the biological availability of medicines, natural substances, vitamins and minerals. The raw material is micronized into particles only a few micrometers in diameter. This increases the surface area of the resulting material and enables faster absorption in the body, increasing the effectiveness of the food supplement.

THE GROWING, PRODUCTION PROCESSES AND RESULTING RAW MATERIALS ARE DOCUMENTED BY GLOBALLY RECOGNISED CERTIFICATES OF QUALITY

ESSENS ALOE VERA 99.5% GEL DRINK - APPLE + ACAI*

- food supplement manufactured from certified Aloe Vera Barbadosis Miller of the highest quality
- apple concentrate has high content of vitamin C, fibre and antioxidants, it helps the normal functioning of the digestive and vascular systems as well as the maintenance of normal cholesterol and blood sugar levels
- acai berry is the fruit of the euterpe brazilian palm, it is characterised by an extremely rich complex of vitamins, minerals, trace elements, essential fatty acids and fibres - this creates strong antioxidant properties and slows down the ageing process
- this gel drink contains all the benefits of the existing ESSENS Aloe Vera 99.5% Gel drink supplements, but in combination with apple concentrate and acai berry, it can also contribute towards
 - detoxifying the body and stimulating the immune system
 - cleansing the vascular system, lowering cholesterol levels
 - treating digestion, reducing fat and weight
 - regulating blood sugar levels
 - slowing down the ageing process
- does not contain artificial colouring, sugar, gluten or lactose

ESSENS ALOE VERA GEL DRINK CONTAINS AN UNRIVALLED 99.5% OF GEL ALOE VERA. IN COMBINATION WITH THE TOTALOE PROCESS AND MICRONIZATION, MAXIMAL POSSIBLE ACTIVE MATERIALS CAN BE ACHIEVED, WHICH MAKES IT THE BEST PRODUCT ON THE MARKET IN THIS AREA!

ALOE VERA

ESSENS ALOE VERA CONCENTRATE WITH HERBAL EXTRACTS

- food supplement manufactured from certified Aloe Vera *Barbadensis* Miller of the highest quality
- active ingredients - extracts of medicinal plants - dandelion, milk thistle, nettle
- does not contain aloein - a glycoside with strong laxative effects, found in the leaves of aloe vera
- supports the work of the digestive system, helps with regular bowel function, supports the movement of intestinal contents
- has a positive effect on the proper function of the liver and contributes to lower blood cholesterol
- supports the body's natural defences
- helps maintain a healthy heart, promotes venous circulation
- positively affects the nervous system's function
- has a positive effect on skin, hair and nails
- does not contain artificial colouring, sugar, gluten or lactose

ESSENS ALOE VERA + Q10

- food supplement developed and manufactured under pharmaceutical supervision
 - active ingredients - aloe vera extract, coenzyme Q10 and black pepper extract
 - supports the body's natural defences
 - acts positively against fatigue
 - positive for prevention of heart disease
 - positively affects the central nervous system
 - does not contain artificial colouring, sugar, gluten or lactose
- Coenzyme Q10 is a substance similar to vitamins and occurs naturally within the human body, especially in the brain and in heart muscle cells. Its effect protects cells in the body from premature damage which naturally protects the cells and the entire body against symptoms of premature ageing.

ESSENS ALOE VERA + BOSWELLIA

- food supplement developed and manufactured under pharmaceutical supervision
 - active ingredients - aloe vera extract, boswellia serrata extract
 - helps maintain healthy bones and joints
 - contributes toward natural collagen formation
 - acts favourably as a prevention against osteoarthritis
 - does not contain artificial colouring, sugar, gluten or lactose
- Boswellia is a tree whose resin was used in ancient Egypt and worth more than gold, thanks to its positive effects on the musculoskeletal system.

ESSENS ALOE VERA SHAMPOO FOR ALL HAIR TYPES ESSENS ALOE VERA SHAMPOO FOR COLOURED AND DRY HAIR

- shampoos for pleasant, fresh, fragrant hair are ideal for everyday use and optimal for those with sensitive skin
- are without parabens and are non-toxic to the environment
- natural ingredient lauryl polyglycosid, from the extracts of corn and coconut oil, creates a rich, thick and stable foam
- high-performance formula ensures an easy washout and accelerates washing process
- patented substance, from the German manufacturer, guarantees easy combing and counteracts dry skin
- aloe vera ensures healthy hair growth, improves hair quality, adds volume, softness, a wonderful shine and penetrates deep into the structure, where it perfectly hydrates and regenerates damaged hair and over-dried tips
- in addition, the shampoo for dyed hair contains special stabilizing agents help to maintain colour stability and effectively wash away coloured pigment released from hair surface

ESSENS ALOE VERA CONDITIONER FOR ALL HAIR TYPES ESSENS ALOE VERA CONDITIONER FOR COLOURED AND DRY HAIR

- pleasantly, fresh scented conditioners are suitable for daily use and optimal for those with sensitive skin
- are without parabens and non-toxic to the environment
- premium patented substance, of German manufacture, Varisoft, facilitates the combing of both wet and dry hair, prevents thermal damage during drying leaving hair supple, silky, rich and glossy
- patented ingredient Olivem forms a protective film on the surface of hair and skin, stabilizing a low static charge
- aloe vera ensures healthy hair growth, improves hair quality, adds volume, softness and wonderful shine, penetrates deep into the structure, where it perfectly hydrates and regenerates damaged hair and over-dried tips
- high molecular silicones provide excellent protection for coloured and damaged hair, protects against UV radiation, thermal and mechanical damage
- the conditioner for dyed and dry hair contains special stabilizing agents help maintain colour stability and effectively wash away coloured pigment released from hair surface

ESSENS Home Pharmacy

FOOD SUPPLEMENTS CONTAINING THE HIGHEST POSSIBLE QUALITY OF ACTIVE INGREDIENTS

- developed and manufactured under pharmaceutical supervision in the Czech Republic
- production is subject to GMP certification under the auspices of WHO - (the World Health Organization) and HACCP certification - (hazard analysis and critical control points determination) and under the auspices of the Ministry of Agriculture according to EU directives
- active substances are obtained exclusively from natural sources
- used materials are not prepared by chemical method
- products are not tested on animals
- products do not contain sugar, gluten or lactose, are made from plant material, are completely safe and non-addictive

Hi-tech production - top revolutionary technological processes:

- **Micronization** - is a method by which pharmaceuticals, natural substances, vitamins and minerals increase their bioavailability. It is the progressive reduction of raw material to a particle size of several micrometers. The resulting substance, thanks to its larger molecular surface, creates conditions for the improvement and acceleration of dissolution in the body and ultimately, a higher efficiency food supplement.
- **Inhibition of enzymes** - a process which results in the reduced activity of enzymes - proteins produced by living organisms which act as a catalyst to bring about many biological processes. Slowing the activity of enzymes leads to an ideal isolation time of the tablet, natural ingredients pepper and curcumin perform this function perfectly.
- **Multilayer coating of a tablet / pellet** - is a unique technology which first appeared on the world market for the ESSENS Home Pharmacy products. Successively depositing several layers with different contents of active substances, the dissolution of the tablet is optimally timed, which leads to revolutionary effects that can be very difficult to achieve through conventional methods.

ESSENS Home Pharmacy food supplements are being used according to biorhythm

- biorhythm is the regular alternation of physical and mental conditions that affect the body, individual organs and cells
- circadian rhythm - the length of a biorhythm repeats within seconds, minutes, hours and days
- circatrigintan rhythm - the length of a biorhythm repeats within months
- circa-annual rhythm - the length of a biorhythm repeats within years
- dosing ESSENS Home Pharmacy food supplements according to the circadian rhythm ensures the highest efficiency and maximum effect is achieved

TECHNOLOGY OF TABLET MANUFACTURE

TECHNOLOGY OF PELLET MANUFACTURE

ESSENS VITAMIN C

- purely natural food supplement developed and manufactured under pharmaceutical supervision
- active ingredients - unique vitamin C with liquorice, strawberry and natural sweetener
- micronization ensure quick dissolution and performance within the organism
- allows unrestricted entry of vitamin C into the body
- thanks to a buffering form it protects the teeth and the mucous membranes in the digestive tract from the otherwise acidic vitamin, liquorice extract contributes to a better absorption of effective ingredients into the organism, which leads to a maximum effect in the body
- does not contain artificial colouring, sugar, gluten or lactose

VITAMIN C DEFICIENCY MANIFESTS FATIGUE, PROLONGED CONVALESCENCE, IMPAIRED WOUND REPAIR, AND REDUCED RESISTANCE TO INFECTIONS. THE IMPORTANT ROLE PLAYED BY ITS FUNCTION IN THE FORMATION OF COLLAGEN, LEADS TO BEAUTIFULLY, SMOOTH SKIN AND A YOUTHFUL APPEARANCE.

ESSENS FLOW'EN

- purely natural food supplement developed and manufactured under pharmaceutical supervision
- active ingredients - extracts from chestnut and black pepper, vitamin C
- helps protect the vascular system
- contributes to the reduction of the feeling of heavy legs and the presence of cramps in legs
- active substance of chestnut speeds up the reduction of swelling whilst having anti-inflammatory effects, improve venous tone, are used during chronic venous insufficiency, for the treatment of varicose veins and haemorrhoids, speeds up the reduction of blood blisters and works against the origins of thromboses
- black pepper contributes to a better absorption of effective ingredients into the organism, which leads to a maximum effect in the body
- vitamin C supports the function of blood vessels and contributes to protection of cells from oxidative stress
- does not contain artificial colouring, sugar, gluten or lactose

ESSENS SLIM'SS

- purely natural food supplement developed and manufactured under pharmaceutical supervision
- active ingredients - apple fibre, green tea extract with catechins and black pepper extract
- helps those who want or must reduce their bodyweight and those who want to maintain their bodyweight
- camellia sinensis helps the body use fat as an energy source, stops water from storing in the body and supports the metabolism, it also has anti-inflammatory effects, works as an antioxidant and slows down the signs of ageing
- apple fibre reduces appetite and provides the feeling of fullness
- black pepper slows the function of digestive enzymes, contributes to a better absorption of effective ingredients into the organism which leads to a maximum effect in the body
- contains caffeine
- without artificial colouring, sugar, gluten or lactose

ESSENS SLIM'SS VIT

- purely natural food supplement developed and manufactured under pharmaceutical supervision
- vitamins A, D, E and K in one tablet, disolvable in fats
- we recommend using this product in the second month of regular usage of Slim'SS
- given for free with 2 months of Slim'SS treatment
- does not contain artificial colouring, sugar, gluten or lactose

26

27

ESSENS HEAD'ES

- purely natural food supplement developed and manufactured under pharmaceutical supervision
- active ingredients - coenzyme Q10, vitamins B, extracts from ginkgo biloba leaves and black pepper
- helps reduce headache
- contributes to an increase in brain activity
- coenzyme Q10 is a substance similar to vitamins occurring naturally in the body, especially in the brain and heart muscle cells, it protects the body cells from premature fatigue and from signs of premature ageing
- ginkgo biloba contributes to the microcirculation of the circulatory system, helps to maintain good memory and improves mental capability
- black pepper contributes to a better absorption of effective ingredients into the organism, which leads to a maximum effect in the body
- vitamins B2 and B6 support the activity of the nervous system and reduce the degree of fatigue and exhaustion
- does not contain artificial colouring, sugar, gluten or lactose

THE CAUSE OF HEADACHE IS THE LACK OF ACCESS TO OXYGEN AND GLUCOSE IN THE BRAIN, WHICH MAY BE CAUSED BY MANY FACTORS. THESE INCLUDE, AMONG OTHER MENTAL AND PHYSICAL STRAINS, SMOKING, HORMONAL CHANGES AND LONG-TERM WORK WITH COMPUTERS.

ESSENS ES'LEEP

- purely natural food supplement developed and manufactured under pharmaceutical supervision
- active ingredients - extract of hop cones, sour cherry and black pepper, inositol and chromium
- optimal for people with sleep disorders and trouble falling asleep
- helps to improve the quality of sleep
- extract of hop cones helps fight insomnia
- hormone melatonin, contained in sour cherry, influences daily circadian rhythm, its increase is connected with the urge to sleep
- inositol has soothing and antioxidant effects
- chromium supports the right metabolism of sugars and fats
- black pepper contributes to a better absorption of effective ingredients into the organism, which leads to a maximum effect in the body
- ESSENS ES'leep is not addictive
- does not contain artificial colouring, sugar, gluten or lactose

LACK OF SLEEP LEADS TO DISTURBANCES IN MOOD, DECREASED ALERTNESS, INCREASES THE LIKELIHOOD OF ERRORS, TRAFFIC ACCIDENTS AND RELATIONSHIP CONFLICTS. IN CHRONIC INSOMNIA THERE IS A RISK OF ADDICTION, BUT INSOMNIA CAN RESULT IN SEVERE MENTAL ILLNESS AND DEPRESSION.

ESSENS CLEA'NS

- purely natural food supplement developed and manufactured under pharmaceutical supervision
- active ingredients - medical magnolia, enzyme protease, black pepper extract and vitamin A
- natural antiparasitic
- ideal for detoxification
- suitable for the initiation of a proper diet
- medical magnolia acts positively for regular intestinal functions
- enzyme protease from aspergillus oryzae supports the proper splitting of proteins in the digestive tract
- black pepper contributes to a better absorption of effective ingredients into the organism, which leads to a maximum effect in the body
- vitamin A maintains the optimum condition of the mucous membranes, including the intestinal tract
- does not contain artificial colouring, sugar, gluten or lactose

THE HUMAN BODY IS A FEAST FOR MANY SPECIES OF PARASITE. THEY CAN OCCUR IN ANY BODY PART IN THE INTESTINES, LUNGS, LIVER, STOMACH, BUT ALSO IN THE BRAIN, BLOOD, SKIN, AND EVEN THE EYES. ACCORDING TO WHO (WORLD HEALTH ORGANIZATION) PARASITES ARE THE CAUSE OF MANY HUMAN DISEASES.

ESSENS HARD'EN

- purely natural food supplement developed and manufactured under pharmaceutical supervision
- active ingredients - extract of unfermented green tea leaves, black pepper extract and amino acids L-citrulline and L-ornithine
- encourages male erection
- optimal for adult men of all ages
- green tea provides the flexibility of blood vessels
- amino acid L-citrulline significantly increases blood flow to tissues and supports sexual function
- amino acid L-ornithine significantly intensifies the effect of L-citrulline
- black pepper contributes to a better absorption of effective ingredients into the organism, which leads to a maximum effect in the body
- to be effective, sexual stimulation is required
- does not contain artificial colouring, sugar, gluten or lactose

REPEATED LACK OF ERECTION MAY LEAD TO THE REDUCTION OF MALE CONFIDENCE AND CONSEQUENT AVOIDANCE OF SEXUAL INTERCOURSE AND MOREOVER ALSO TO THE DISINTEGRATION OF A RELATIONSHIP.

What is detoxification of an organism?

Detoxification is the process by which the body removes the harmful effects of toxic substances and toxic gases. Among these toxic substances are cigarette smoke, chimney smoke, exhaust fumes, pesticides, heavy metals, harmful paints, improper cosmetics, toxins in beverages and foods, toxic medicaments, plastic softeners, hormones but there are many more. Although the human body possesses the ability to exclude the majority of toxic substances, it is beneficial, from time to time, to help remove the harmful products of metabolism, purify the blood and strengthen the detoxification organs, including the liver, lungs, intestines, kidneys and skin itself.

Why is detoxification important?

Every season brings a different degree of burden to our bodies, especially in winter, which brings the biggest flooding of toxins to our bodies. The human organism is weakened and languished. Detoxification promotes an overall high metabolism, help for the immune and nervous systems and brings the body relief.

ESSENS DETOX

The basis for the three-month ESSENS product line detox is ESSENS Home Pharmacy and combination of products:

1x ESSENS ES'Pure Start, 2x ESSENS ES'Pure, 3x ESSENS Flow'EN and 1x ESSENS Clea'NS.

The uniqueness of the ESSENS Home Pharmacy detox is in the synergy between our top products. These have themselves excellent results in specific applications, but the effectiveness of the four products in complex treatment does not accumulate, but instead multiplies.

set price
109.00 €

ESSENS ES'PURE

- purely natural food supplement developed and manufactured under pharmaceutical supervision
- active ingredients - magnesium, manganese, amino acid taurin and vitamins B6 and B9
- combination of magnesium and amino acid taurin have beneficial effect on liver regeneration, which among other things has the function to cleanse the body of toxins circulation in the blood or lymphatic system
- B vitamins help to reduce fatigue and exhaustion, have an effect on energy metabolism
- does not contain artificial colouring, sugar, gluten or lactose

ESSENS ES'PURE START

- purely natural food supplement developed and manufactured under pharmaceutical supervision
- the maximum effectiveness of the ES'Pure Start food supplement is achieved in combination with other ESSENS Home Pharmacy products and because of this, is not sold separately.
- active ingredients - wide spectrum of B vitamins from brewer's yeast
- B vitamins have a positive effect on energy metabolism, reduce fatigue and exhaustion, and contribute to the optimal functions of the nervous system
- does not contain artificial colouring, sugar, gluten or lactose

What is lactoferrin?

Lactoferrin is a multifunctional protein from the family of transferrins (carrier of trace elements such as iron, copper and zinc), which occur naturally in the human body. It is presented in exocrine secretions, particularly in blood plasma and white blood cells.

Lactoferrin can also be found, in small amounts, in all bodily fluids and is in fact part of innate immunity. Lactoferrin is naturally occurring meaning it is recognised and accepted without rejection. Furthermore no resistance has yet been recognised. Lactoferrin is effective for all of us, regardless of gender and age.

ESSENS Lactoferrin is obtained from bovine milk. The reason being is, it's most similar to human milk and has the same effects during comparative tests. The human and bovine lactoferrin differs in only 2 amino acids (it consists of 700 amino acids), while for individual humans this difference can vary up to 8 amino acids.

Lactoferrin has a broad range of activity and has a positive effect on the human body. Its main function is bound and maintains constant and equal levels of iron in the body. At the same time, lactoferrin possesses the following characteristics:

- antimicrobial (acts against microorganisms)
- antibacterial (acts against bacteria)
- antiviral (acts against viruses)
- antifungal (acts against fungi)
- antioxidant (protects the organism against the harmful effects of chemicals that we face every day)
- acts antiparasitic
- acts against cancer-causing cells
- acts against dangerous radiation
- has an anti-inflammatory effect

The nativity (remaining undamaged by heat, enzymes and chemicals during manufacture) of lactoferrin is a very important parameter. We emphasise that our lactoferrin is treated with sophisticated technology and is extracted from fresh skimmed milk and not from whey, which is a waste material in dairy production.

Another important factor contributing to high quality is the degree of saturation by iron (but also copper or zinc) due to optimal regulation and maintaining the constant level of trace elements in the body. Under normal circumstances the saturation of lactoferrin fluctuates between 10 – 30%. If lactoferrin is saturated more than 80%, its antimicrobial and anti-inflammatory effect decreases. ESSENS Lactoferrin passes through a strict control of saturation by iron and its content is mere 23%, which is very low.

The lactoferrin molecule has another great advantage - it is more stable against acids and enzymes. Any inflammation in the body is accompanied by acidification of inflamed tissue and many active materials (such as antibiotics) lose their effectiveness in these surroundings. But lactoferrin, even within secretions, is still active and effective.

36

37

ESSENS LACTOFERRIN TABLETS

- purely natural food supplement developed and manufactured under pharmaceutical supervision
- active ingredients - lactoferrin, iodine, selenium and sour cherry extract
- does not contain chemical substances, sugar, lactose or gluten
- only the ingredients of the highest possible and guaranteed quality are used for manufacture
- it is made by special SOFT tableting technology. This special manufacturing process doesn't cause denaturation, and thereby doesn't reduce the activity of lactoferrin. This special technology of processing lactoferrin is not used by any other company in the world!
- many years of research has shown, that if we add a special bond of iodine and selenium to lactoferrin, the therapeutic attributes of the tablets are significantly improved
- iodine and selenium are important for proper functions of the immune system, regulating the thyroid and protecting the cells against free oxygen radicals
- sour cherry fruit extract contains active substances that support the maintenance of a good physical condition
- helps with acute cold or flu
- has positive effects on intense problems of the digestive tract, such as viral diarrhoea, alimentary diseases, Crohn's disease, ulcerative colitis and celiac disease
- is preventative and protective of the body, for example, during radiotherapy in cancer patients
- helps to remove pathogens from the body (bacteria, viruses, yeasts, moulds and fungi)
- helps strengthen the immune system
- helps in cases of anaemia caused by the lack of haemoglobin in the blood, as it can better use ingested iron, which is important in creating blood cells and haemoglobin
- has a positive effect on the suppression of oxidation processes in the body that cause cell ageing and cardiovascular disorders
- helps with skin problems (acne, atopic dermatitis, erythema, etc)

LACTOFERRIN

38

39

ESSENS LACTOFERRIN UNGUENTUM

- unique healing ointment developed and manufactured under pharmaceutical supervision
- ESSENS Lactoferrin Unguentum is the result of a developed cooperation between PharmDr. Milan Krajčiek and other professional scientific medical institutions
- does not contain chemicals, preservatives, stabilizers or colouring
- only ingredients of the guaranteed, highest possible quality are used for manufacture
- unique combination of lactoferrin and virgin olive oil provides optimal hydration, easy coverage and excellent penetration of the skin by the ointment
- supports the accelerated healing of a wide spectrum of injuries such as abrasions, minor cuts, burns, postoperative wounds and bedsores
- helps with infectious, viral, fungal or yeast diseases of the skin and mucous membranes
- helps accelerate the healing of herpetic infections (herpes, mouth ulcers)
- helps with skin problems such as acne, atopic dermatitis, erythema, cracked corners of the mouth and irritated skin around the nose during cold etc.

Wound healing on the skin surface or on mucous membranes is a complicated biological process that can be medically categorised into 5 stages:

1. haemostasis, the automatic reactive ability of the damaged organism to stop bleeding, a very demanding and effective reaction from the body
2. reparative inflammation is the stage of the activation of numerous materials and growth factors that repair or replace damaged or injured tissue
3. granulation is the process of forming granulation tissue which progressively fills the wound from its edges, new vessels and a network of collagen are formed
4. epithelization is the process of replication and migration of epithelial cells into the unhealed areas of skin or mucous membrane which leads to the formation of a new covering tissue, which replaces the provisional one
5. wound remodelling is the final stage when the adequate strength and adaptation to conditions of natural processes within the body is established in the new tissue

The research of medical specialists has come to the conclusion that inflammation is the entrance process for wound healing. Excessively long periods of inflammation or a high inflammatory reaction can lead to poor wound healing and can be a cause of complications in the processes leading to recovery.

ESSENS Lactoferrin Unguentum helps to initiate the first stage of inflammation, and contributes to finishing this stage quickly. It then helps the body into the next phase of healing, whilst additionally contributing to the migration of newly created and healthy skin cells and connective tissue cells for fixation into new, connective networks.

ESSENS Lactoferrin Unguentum belongs among the products that support a damp wound healing. It is connected with other positive influences such as the acceleration of the granulation and epithelization processes. A state with constant pH and temperature is maintained in the wound. The ointment prevents the penetration of infection, limits the activity of reactive oxygen radicals and thanks to the absence of water in the ointment base, the wound is not macerated.

LACTOFERRIN

40

41

NUTRIESSENS

Introducing the brand new product line NUTRIESSENS, developed by a group of leading pharmacists.

These are delicious, tasty gels, belonging to the food supplement category, in a modern and practical package.

The gels are on sale as a weekly or monthly treatment. One-day, 50g dosages are individually packaged which allows for not only immediate consumption, but also a gradual consumption, which can be spread over a period of several hours, thanks to the resealable lid.

The two base NUTRIESSENS products help during a challenging working day due to their composition and the complex manufacturing processes which are used. These were chosen to meet the required functions to the maximum extent. Those functions are as follows: supply the body with energy and vice versa, calm the body during early evenings to relieve feelings of exhaustion.

The high bioavailability of the contained ingredients is achieved through modern technological processes which guarantees the maximum usable efficiency. Products are subject to GMP and HACCP certification.

44

45

ESSENS LIFT UP*

- a food supplement in the form of a delicious orange-flavoured gel
- active ingredients - schisandra chinese extract, sucrose, trehalose, taurine amino acid and group B vitamins
- ESSENS Lift Up is optimised to deliver the morning energy needed to start the central nervous system and organs, help prepare the body for all-day, heavy, physical and mental exercise
- the woody creeper, schisandra chinese, from asia is grown as a medical plant; it is categorised amongst adaptogens (substances that increase the resistance of organism under stress and extreme conditions, they stimulate the brain, peripheral nerves and strengthen cognitive function)
- sucrose and trehalose are natural carbohydrates and act as a massive source of glucose for brain cells
- trehalose stimulates the unique mechanism of autophagy and has the ability to maintain a longer life of proteins
- group B vitamins contribute to reducing fatigue and exhaustion, which positively affects energy and metabolism
- the amino acid taurine promotes cardiac activity and prevents the development of macular degeneration
- the gel does not contain artificial colouring, gluten or lactose; a very low glycemic index allows diabetics to use this food supplement

ESSENS CHILL OUT*

- a food supplement in the form of a delicious sour cherry-flavoured gel
- active ingredients - sour cherry extract, tryptophan amino acid, vitamin B6 - pyridoxine, glucose
- ESSENS Chill Out helps to calm the body in the evening, relax the mind, relieve the feeling of exhaustion and increase overall mental well-being and better preparation for falling asleep
- sour cherry extract stimulates the production of insulin, which, in combination with the amino acid tryptophan and vitamin B6, leads to serotonin formation and increased melatonin levels
- the neurotransmitter serotonin is a biologically active substance, produced in the brain, which influences perception and induces feelings of a good mood; decreased serotonin levels increase stress, depression and anxiety
- the melatonin hormone is a natural ingredient of the cherry extract, it affects daily circadian rhythms and a rise in its levels is connected with the urge to sleep
- the gel does not contain artificial colouring, gluten or lactose; a very low glycemic index allows diabetics to use this food supplement

AUTOPHAGY - THE PROCESS OF RECYCLING DAMAGED OR UNNECESSARY CELLS INTO STORED ENERGY. AUTOPHAGY WAS DESCRIBED BY THE JAPANESE SCIENTIST ŌSUMI YOSHINORI, WHO RECEIVED A NOBEL PRIZE IN PHYSIOLOGY AND MEDICINE IN 2016. IT WAS SHOWN THAT AUTOPHAGY FAILURE CREATES DIFFICULTY FOR THE IMMUNE SYSTEM WHEN FACING SOME MAJOR DISEASES.

ESSENS HAND CREAM

- gentle and moisturising hand creams effectively nourish and protect dry and damaged skin, care for nail beds and restore their elasticity
- they are suitable for everyday use and for all skin types
- they provide intense hydration and protect it from drying out, cracking and the effects of adverse external influences for the whole day
- glycerin which, in addition to possessing fantastic hydrating properties, has been shown to have a very positive effect on skin cells, furthermore, it creates a protective barrier on the skin surface
- patented PENTAVITIN® provides instant deep hydration, which is released for up to 72 hours and strengthens the skin's protective function
- tocopheryl is a form of vitamin E and it acts as an antioxidant, slows the scaling of the skin and prevents its ageing, which is manifested by pigment spots, wrinkles and loss of strength
- shea butter perfectly hydrates and prevents premature ageing of the skin
- creams are easy to apply, absorbed quickly and do not leave a greasy feeling

DERMATOLOGICALLY TESTED

ESSENS FOOT CREAM

- this soft and hydrating cream effectively nourishes and regenerates dry and damaged feet
- suitable for everyday use
- provides intense hydration, softens hardened and wrinkled skin, cares for cracked skin, prevents the appearance of dry patches and pleasantly comforts and refreshes tired legs and feet
- urea, or uric acid, is widely used in medical cosmetics for its hydrating and softening properties. It reduces water loss and increases skin regeneration whilst being known primarily for its positive effect in the treatment of eczema
- cocoa butter is a natural antioxidant and has excellent moisturising features which can be suitably applied to cracked skin, it is absorbed easily by the skin and remains there for several hours
- boswellia, a tree used for centuries, is known for its anti-inflammatory effects and its positive influence on the musculoskeletal system
- in addition to superior hydrating features (proven by studies), glycerine has a very positive effect on skin cells, subsequently a protective barrier is created on the surface of the skin
- allantoin regenerates cells and supports cell division, thereby accelerating healing processes
- shea butter perfectly hydrates and prevents the premature ageing of skin
- tocopheryl is a form of vitamin E, it acts as an antioxidant, slows down the scaling of the skin and prevents its ageing
- tea tree oil possesses antiseptic and antimycotic properties
- the cream applies easily, is absorbed quickly and leaves no greasy feeling

ESSENS Sun Care delivers a revolutionary way of sunbathing!

Safer UV protection, optimal protection for sensitive skin and a longer life for your tan!

Eusolex® UV-Pearls®

- revolutionary concept for protection against UV
- UV-PEARLS® are the sunglasses for your skin!
- a patent from a German science and technology company operating in the fields of pharmaceuticals, natural sciences and materials for advanced technology
- organic UV filters are locked in micro-capsules, they are a unique, micro-encapsulation of sunscreen in silica glass pearls
- encapsulated UV filters remain on the skin surface, which guarantees a high UV protection, the sunscreen does not come into direct contact with the skin meaning they are optimal for those with sensitive skin, skin is soft after use, not greasy

Thalitan

- a unique oligosaccharide of plant origin from the seaweed laminaria digitata
- top product from a French company specializing in biotechnology and active substances from sea environments
- helps stimulate tanning while protecting the skin from the harmful effects of the sun
- promotes the production of skin pigment melanin, enhancing UV protection
- contains manganese and magnesium ions, which have antioxidant effects

How to use ESSENS Sun Care

Going on vacation to the beach or in the mountains? Will you be exposed to the sun?

To achieve optimal results while sunbathing, bronzed skin without burning, minimal wrinkle occurrence and a reduced risk of skin diseases, it is recommended to use the ESSENS Sun Care products as follows:

1. Begin using your first ESSENS Sun Care Tablets 3 days before vacation departure. Take one tablet, 3 times a day, after main meals. Finish your remaining tablets during the holiday. These tablets were developed to complement the human body with raw materials that produce brown pigment, accelerate tanning, and help skin remain more tanned and glossy. The unique composition also has a positive effect on the immune system, which may be weakened during excessive exposure to the sun.
2. Prior to the application of our sunscreen, apply our Before Sun Care Gel to your skin. This creates a base for our sunscreen to sit upon ensuring it holds very well and is easily spreadable, further assisting in even protection with the help of UV filters. This gel additionally contains substances which stimulate the skin to produce more vitamin D and melanin - brown pigment.
3. Approximately 15 minutes after applying ESSENS Before Sun Care Gel, it is a good time to apply either ESSENS Sun Care SPF 30 or ESSENS Sun Care SPF 50 to the skin. The protection factor is usually selected according to the skin type and intensity of sunlight, to which it will be exposed. ESSENS Sun Care sunscreens include effective protection against both UVA and UVB rays and contain substances to assist in the accelerated browning of skin.
4. After sunbathing, apply our ESSENS After Sun Care Milk, which is used for skin regeneration. It reduces redness and adds that much-needed hydration, thereby prolonging your tan.

Why follow your skin phototype when choosing the protective factor?

The number of minutes specified for your phototype is multiplied by the number of SPFs. The resulting number should amount to the number of minutes that can be spent in the sun without the risk of burning.

Phototype	Description of skin	Skin's own protective period
1	Very pale, blonde and freckled, almost never tanned, reacts highly sensitively - almost always burns. Blonde or red hair.	5 - 10 minutes
2	Light, prone to freckles, hardly tans and reacts sensitively - often burned. Bright hair.	10 - 20 minutes
3	Common natural colour, no freckles. May redden after sunbathing, but tans evenly and rarely gets burned. From dark blonde to medium brown hair.	15 - 25 minutes
4	Darker skin that tans quickly and the probability of burning is minimal. Brown to black hair.	25 - 35 minutes

The table is for guidance only. It is necessary to take into account your state of health and other factors.

ESSENS BEFORE SUN CARE GEL

- gently hydrating skin care gel for all skin types
- is without parabens
- ensures the hydration of the skin before tanning, prevents the escape of water from the skin during exposure to high temperatures
- smooths wrinkles and skin unevenness, thus ensuring an even application of sunscreen with a protection factor
- contains panthenol and thalitan which stimulate the skin into producing vitamin D and the skin pigment, melanin
- the extract of aloe vera penetrates deep into the skin structure, where it perfectly hydrates and regenerates

200ml price
16.30 €

ESSENS BEFORE SUN CARE TABLETS

- purely natural food supplement developed and manufactured under pharmaceutical supervision
- helps prepare the skin for sunlight
- promotes a good, bronze tan and prolongs its durability
- contains spirulina, a freshwater cyanobacterium which is rich in carotenoids (red-orange pigments) that further extend your tan, spirulina also supports the immune system due to the very high content of vitamins A, B, C, D and E
- amino acid L-tyrosine supports the production of skin pigments and melanin working as a tan "accelerator"
- extract of aloe vera helps to maintain healthy skin
- does not contain artificial colouring, sugar, gluten or lactose

price for 50 tablets

BEAUTY

ESSENS BEAUTY

Underline your deeper beauty and dazzle those around you. An entirely new range of cosmetics is arriving. ESSENS Beauty is here for you. Sophisticated production technology, high coverage capabilities and trendy shades will bring you to new heights. Our long-lasting, premium quality make-up will last the whole day to ensure an attractive look can be maintained. In addition, our cosmetics are paraben-free and have been both dermatologically and ophthalmologically tested. Each product is exclusively packaged in an elegant box. Indulge in perfect make-up which will cover the unevenness of your skin and unite its colour tone. Fix it with a matte powder to experience a long-lasting, perfect look. Conjure up seduction by using eyeliner, maximising the volume of your lashes, and, don't forget, to highlight the shape of your brows. Draw the contours of your lips and fill them with a moisturising, matte lipstick - turn into a seductive goddess. Keep in mind that nail polish adds to your best, feminine qualities and further enhances your attractiveness. Our wide shade palette is available across the entire product line, there is something for every woman or girl.

ESSENS BEAUTY MATTE FOUNDATION*

This long-lasting matte foundation perfectly balances skin colour tones, conceals any inequalities and provides perfect coverage for many long hours. The oil-free composition ensures a smooth and matte effect and, thanks to the SPF 15 protection factor, the skin is protected against harmful sun rays.

WITHOUT PARABENS

1.6g price
5.60 €

ESSENS BEAUTY EYELINER

The fine eyeliner pencil and its soft structure allows for very easy and accurate application. A combination of lighter shades in the inner corners of your eyes gradually blended into darker colours achieves perfect and natural highlighting. By choosing lighter colors, the eyes look aesthetically bigger. Overly black sharp contours are instead diminishing.

ESSENS BEAUTY FALSE LASHES MASCARA

This lash-extending mascara creates thick and curved lashes for an attractive look. The flexible, rounded head of the rubber brush captures each, individual lash from its root, thereby maximising volume and recreating the stunning effect of false lashes. For a better look, we recommend a repeat application, lashes will be prolonged significantly, yet remain naturally flexible, will not stick or blur and the charming look will last throughout the day.
