

# Minecraft 1.12 Turn off Tutorial/instructions

It is possible to disable it in MC 1.12+ but only on the client side. Players have to disable it themselves.

Note: Make sure that you have your minecraft closed for this to work.

1. Find your .minecraft folder and open it. Enter %appdata% into the search bar in the left side in the bottom corner in case you don't know where your .minecraft folder is. 2. Then, find the file "options" (or "options.txt") and then open it. 3. Minecraft-servers.me Search for "tutorialStep:" in the options file. It is easy to locate it by pressing CTRL + F on your keyboard and typing tutorial into the search box. 4. Replace "tutorialStep:(anything that was written here, delete it)" with "tutorialStep:none". Save the file, launch your Minecraft game, and then join an online multiplayer server or a single player world in order to see if you've done it correctly.

That's it.

Are you still having issues? Here's a video tutorial made by someone on youtube.
