Equipoise is the brand name of the steroid Boldenone Undeclylate, which is a derivative of Dianabol made specifically for the veterinary industry, mainly for the treatment of recovery after injury or high exertion. However, the first human-grade variation came about in the early 50s, had some success in the 60s and 70s, and discontinued for medical use by the end of the decade.

Boldenone Undecylenate is a testosterone derived anabolic androgenic steroid that is best known by the trade name Equipoise given to it by Squibb in the 1970's. While Equipoise is officially classified as a veterinarian grade anabolic steroid, the first batches of Boldenone were introduced on the human grade pharmaceutical market by Ciba in ...

It substitutes this hormone for the duration of the cycle. Sure, when an athlete stops using this synthetic steroid, he faces the problem of low testosterone. His body needs some time to restore its production. Today I had to own a big mistake in business. There was still a little part of me that wanted to blame it on circumstances but that's only a weak attempt at saving face. To fully own it is the only path. [on front page](#)
