

Your Eyecare Needs in One Place

<http://eyes4kids.com/our-practice/>

π

For over 30 years Pediatric Ophthalmology Consultants has been dedicated to providing the highest quality, cutting-edge Pediatric and Strabismus eye care to our patients.

Our beautiful, spacious office conveniently located is equipped with the latest child-friendly diagnostic equipment and staffed with exceptionally enthusiastic well-trained assistants and staff, to make your child's experience with us a unique one.

We specialize in all aspects of pediatric eye care from evaluating for vision problems to managing complex medical and surgical problems of infantile and childhood strabismus, amblyopia, ptosis, lacrimal or tearing problems, infantile and developmental cataracts, congenital malformations of the lids and eyes, infantile and childhood glaucoma, ocular injuries, ocular tumors, and other neuro-ophthalmic causes of visual loss.

In addition, consultations are offered within the hospital setting for infants with retinopathy of prematurity, multiple congenital defects, and in support of infants and children being evaluated for metabolic and neurological problems.

We also offer a complete contact lens department for therapeutic as well as elective needs.

π

From fitting to training on site, from the most simple to the most challenging patients.

π

We also have on the premises an Optical Shop with the largest selection of infants, kids and teens frames, with the latest styles and brand names.

We take care of all your
eyecare needs in one place:
