

# Our Servers Feature The Most Stable Environment

KnownHost's Managed Dedicated Servers are built-to-order with dedicated infrastructure, customizable, secured, and fully optimized straight out of the box for high-traffic users and businesses. Our servers are designed to process large amounts of data in a stable environment. These packages are standard options and can be customized to suit your specific needs. All Dedicated hosting packages are Linux-based and come with the DirectAdmin or cPanel control boards. They are housed in our Central US (GA), US datacenter that includes premium bandwidth such as Internap and level 3, and is fully customizable with root access for the more technical user. You can count on a top-notch managed server admin team that is available 24/7/365 and industry-leading uptime at an affordable cost with all Managed Server Hosting options. To get pricing on a variety of upgrades, contact our Sales Department at [sales@knownhost.com](mailto:sales@knownhost.com)

We now offer external storage packages as an option to provide additional backup for dedicated servers! We also offer custom configurations including varying SSD and SATA drives, both hardware and software RAID configurations, gigabit port upgrades and many other options. Feel free to contact us at [sales@knownhost.com](mailto:sales@knownhost.com) if you need any assistance with ordering our dedicated server solutions.
