

Launcher Installer Stuck

I downloaded MC from the official website. When MINECRAFT TOWNY SERVERS try to run Launcher Installer, it appears with the message "Making things incredible" and the progress bar won't move. I've tried closing it and opening it. I've also tried closing it and then reopening it. If that doesn't work, I'm trying Java edition.

The new launcher (released on November 2) has not been resolved for many players.

If you have the game installed and not just on GamePass For now, just download and install the Windows 7/8 launcher. It's the launcher they refer to as "the launcher" that we have used for a long time. (Link)

To stop the upgrade nag, right-click the old launcher shortcut and change compatibility to Windows 8 under the Compatibility tab.

You're a lifesaver! It wouldn't download after I downloaded it. I had the same problem as the man who posted this. It worked!

PS- scroll down the link and you'll see an the option that says launcher for Windows 7/8 and downloads are available from there. I'm dumb, I kept downloading window 10/11 again and again lol.

Thanks! That worked. It worked.
