

DEEP SPACE

Unlimited Possibilities

Intro

What is Deep Space?

DeepSpace is a community governed, decentralized space exploration metaverse project, where anyone can unleash their cosmic creativity. Buy, sell and trade virtual assets including spaceships, virtual lands in NFT forms.

ECOSYSTEM

In the mission to build a virtual space game for all.

● Metaverse

Immersive 3D virtual space game, built on Unreal Engine 5 and Polygon.

● Acai Marketplace

Acai Market enables participants to manage and exchange DeepNFTs, sold in \$DX0.

● DX0 Token

The utility & governance token of DX0 ecosystem, powered by Ethereum Blockchain.

● Saturn NFTs

Non-fungible, transferrable digital assets representing in-game assets.

● DAO

Decentralized Autonomous Organization created to govern the DX0 Ecosystem.

● Accounts

Graphical representation of players in the the metaverse game.

Planet X0-1

X0-2 is the genesis planet of Deep Space metaverse, being the only habitat planet of the Arch galaxy. Digital land in X0-1 will be sold via DXO staking model.

Governance

DXO is the governance token of Deep Space Ecosystem.

Marketplace & In-game Currency

DXO utilized as in-game currency in Acai marketplace.

Tokenomics

1 Trillion - Total Supply

0% - Trading Tax (ZERO TAX)

3% - Influencers (1.5% vested in every month)

4% - Operations (4 months lock-up)

2.5% - Marketing (2 weeks lock-up)

90% - Sold to the public (Instant unlock)

Inter-galactic Mission

Mission #1

- DeepSpace Token Launch
- Website Launch
- 1000 Holders
- 5000 Telegram Members
- CMC & CG Listing
- Marketing & Influencers
- Saturn NFT Testnet

Mission #2

- 10,000 Holders
- NFT Marketplace
- Staking Launch
- G07 Testnet Launch
- BSC & Polygon Bridge
- XO-2 Planet land presales
- Strategic Partnerships

Mission #3

- 100,000 Holders
- Metaverse Beta Launch
- Cosmos Chain Integration
- Network fees in **DXO**
- DXO DAO Launch
- Major Marketing Funding
