New Content

Objects

Music Discs

The replace provides a new music disc that's notable for its brown texture. The track for it was recorded by Lena Raine. There's a small chance to find out the disc within the chests of a stronghold or a treasury.

New World Era Options

Caves

Now the caves look fully totally different as the result of being reworked. Now they stretch down to  $Y = -59$  and consist of two forms of blocks depending on the depth. Down to  $Y = 0$ , the caves largely encompass the extraordinary stone block, whereas the layers under will consist of deepslate. Such blocks as earth, dirt, andesite, and granite are usually not generated in the deepslate layer, so they can be found only above  $Y = 0$ . The ores in a cave are generated depending on a block type; that's, in stone caves, the ore might be in the form of a stone, whereas in deepslate caves, they will be inside a deepslate.

Fissures and noise caves have been added. The fissures are very much like canyons but are slender and stretch much deeper. There are also new ore veins which are elongated ore formations of enormous size consisting of ores and another blocks. They are often of two

varieties - copper and iron. Copper veins are generated together with granite at the extent above 0, whereas iron veins generate together with tuff and are situated under 0.

## Mountains

Mountains are actually associated to six totally different biomes.

### Mountain Meadow

It's the bottom mountain layer, which is an abnormal meadow however located on the foot of a mountain. There are lots of flowers there, and the plants have a slightly different color resembling a mixture of inexperienced with a mild blue shade. It is feasible for villages to generate in this biome. It's a habitat of rabbits, sheep, and donkeys.

### Mountain Grove

This biome mainly consists of snow blocks and resembles the snowy taiga. Its vegetation consists of spruce bushes. It's a habitat of quite a few sorts of animals, together with pigs, sheep, chickens, cows, wolves, foxes, and rabbits. Pillager outposts will also be encountered there.

### Snowy Slopes

They mainly consist of powder snow blocks and ice. They're generated on the slopes of a mountain, given there is a plain or a snowy tundra on the foot of it. Very few kinds of creatures dwell there: only rabbits and goats, in addition to igloos and pillager outposts in the case of the hostile ones.

## Peaks

Peaks are available in three totally different varieties: stone, frozen, and jagged. A rocky peak generates if a mountain is high enough and there's no less than considered one of the following biomes at the foot of it: desert, jungle, savanna, or wasteland. Frozen peaks are generated if there are snow biomes close to the mountains. Solely goats reside there. A jagged peak is a mixture of the rocky and frozen peak biomes. That is, it consists of blocks of snow and stone. Only goats spawn there.

## Adjustments

### Blocks

### Big Dripleaf

A giant dripleaf can now be positioned in the sport world solely on certain sorts of blocks, including clay, coarse dirt, dirt, farmland, grass block, moss block, mycelium, podzol, and

rooted dirt. It is the listing of all the blocks, on which one can put a big dripleaf, others will not apt.

## Copper Ore

If you happen to install this update, the copper ore will drop barely more uncooked copper: as an alternative of 2-3, you may get 2-5.

## Redstone Comparator

When the comparator is active, the texture of its base will be completely different.

## Vines and Kelp

If you happen to lower off the tip of a vine or kelp, it is not going to continue to grow. This equally applies to cave, twisting, and weeping vines. Moreover, the texture of the cave vines has been changed - a gray pixel has been faraway from them.

## Block of Copper

A block of copper can now be reworked to 4 cut copper.

## Enchanting Table

The enchanting desk now emits a gentle degree of 7. In addition to, one texture has been changed; namely, the lapis lazuli icon associated to it's going to now be an identical to the standard one.

## Wither Skull

The wither's skull texture has been updated and now corresponds to the updated texture of the wither's head.

## Doorways

Changed the texture of many door types when they're is within the inventory. The textures of another gadgets have additionally been modified, for instance, the campfire, soul campfire, sign, item frame, and glow item frame.

## Mobs

### Axolotl

Now this creature spawns only in lush caves and only above clay blocks. minecraft servers

### Goat

It will possibly spawn only in three new mountain biomes: frozen peaks, jagged peaks, and snowy slopes.

#### Vindicator

The conduct of this hostile mob has been modified: now it doesn't assault child villagers. This equally applies to pillagers, evokers, and ravagers. However, the babies will nonetheless be afraid of them and run away.

#### Glow Squid

It now spawns solely underneath  $Y=30$ .

#### Cod

Now they spawn in water between  $Y=50$  and  $Y=64$ . This equally applies to such fish as salmon, pufferfish, tropical fish, dolphin, and squid. Nonetheless, tropical fish can spawn at any height in lush caves.

#### Zombie Villager

The texture of this hostile creature has been modified: the redundant pixels have now been faraway from it. This is also true of the weaponsmith zombie villager.
