

## **Cartridge Feathers as a Unique Fashion Statement**

The current trend in the society is to make fashion statements with your outfits and also utilize materials that express individuality whether at an event, at home or in the workplace. One unique way to do this is to adopt the quirky cartridge feather trend. Such quirky feather styles can be incorporated into dresses, hats, and other fashion accessories such as earrings. It can also be used in home décor. It could be used to design centerpieces and decorate flower vases.

### ***Feather Collection***

A wide array of feathers can be used for cartridge feathered products; some of them include pheasant feathers, ostrich feathers, rooster hackle feathers, and feather plumes from other kinds of birds. These feathers are available in different sizes, lengths, and colors (both natural and artificial color tones). Feathers are bleached and dyed to generate different artificial color tones such as white, black, red, purple, and yellow. The choice of feathers depends on the intended purpose of its use.

### ***The Magnificence of Feathered Cartridges***

With cartridge feathers, you can steal the show and express your inner cravings. No wonder feathers have found increased relevance as suitable accessories in combination with cartridge shells. The alluring and unique characteristics of **pheasant tails feathers** and rooster hackle feathers in particular have resulted in their versatile application in the production of cartridge-inspired feather products like lapel and hat pins, broaches, bracelets, centerpieces, earrings as well as interior and exterior decorations.

### ***The Peculiarity of Pheasants in Feather Trends***

The pheasant feathers are collected from both male and female pheasant birds. The male pheasants are colorful and long-tailed while the female pheasants are brown-colored and short-tailed. There are different varieties of pheasant quills used for the aforementioned applications; they include Lady Amherst pheasant feathers, ring neck feathers, silver pheasants, golden pheasant feathers, and reeves/long-tailed feathers.
