

# Sustaining an Eco-Friendly Lifestyle

Environmentally speaking, not all are aware of the sad state our planet is in. And those who are woke are charged with the responsibility of letting others know what they can do to sustain an eco-friendly lifestyle. We all want to do our share to save the planet by using biodegradable products.

Good thing there are many biodegradable products made in Australia. Technology has allowed us to make these products while living a lifestyle that will not harm the environment. Many of these products like detergent and soap, stationery products like pencils, folders, erasers, diapers, biodegradable bags, cups, plates, and other utensils, haircare products, and cosmetics are made from natural and biodegradable materials.

The list goes on and on. And you'll realise that there are many Australian-made biodegradable products that can sustain any lifestyle you want and still remain eco-friendly. Take for example the bags we have at Zero Waste. From food storage bags to compostable mail satchels and waste bags, you're on your way to making a difference in the environment.

If you're sending out items, why not try our eco-friendly compostable mail satchels and garment bags? They can be customised according to your needs—from the size to the colour, and even to the message you want on them.

Love shopping? Our practical, reusable, and eco-friendly string bags are a perfect replacement for plastic shopping bags. Made from cotton, it's compact, lightweight, and very convenient to carry around. The design doesn't look dated. What's more, it can handle a load of 5 Kg! That's a lot of things in the bag for you!

Keep your meat and other food items fresh with our food-grade PEVA food storage bag. PEVA is totally chloride-free, PVC-free, lead-free, BPA-free, and much more eco-friendly than PVC, making it totally safe for you and your family. Our food bags are leak-proof, with double-lock closure, providing the best air-tight seal, perfect for storing and preserving food.

Got pets? Our pet poop bag dispenser waste garbage holder with compostable bag is easy to carry with you as it's small and very convenient to carry around when you're out with your fur baby. You can also temporarily store the poop in it if there's no garbage bin around. That's how handy our pet poop bag is.

And speaking of poops, we also carry BioBag® compostable waste bags. BioBag® liners and sacks offer easy and hygienic solutions for households and commercial kitchens. Our breathable bags and sacks come in several types and sizes, from doggy bags to 80L bags. These bags are palm oil-free and GMO-free.

With these alternative eco-friendly and bio-degradable bags, not only are you doing your share to save the planet and its environment but you're also promoting a sustainable, eco-friendly lifestyle.
