This new launcher consolidates Minecraft video games, such because the dungeon crawler and action-journey: Minecraft Dungeons and Minecraft Bedrock Edition, for easy access, especially for Windows 10 and eleven users. Nevertheless, gamers have described specific issues when making an attempt to launch their games. Per Reddit, players have claimed a two-hour obtain time or no loading at all. It is also been reported that there are points with modding, problematic framerates, and the infamous blue screen.

In a video created by YouTuber DCMX Gaming, he offers a tutorial on fixing points regarding downloading Minecraft mods when using the new launcher. His solution involves returning to the outdated launcher in which compatibility remains to be good with Windows 10. Other options which have surfaced are the standard "restart your Pc" request, checking if the participant's antivirus or firewall software is blocking the launcher, uninstall and reinstalling the launcher, or downloading the launcher straight from the Microsoft Retailer.

At occasions like this, it's superior that players come collectively to assist one another repair their launching points, posting movies, and suggestions, no less than till developers come to their aid. minecraft servers supplies much support by the Minecraft Support Middle and its Mojang Twitter page. It asks that players submit screenshots to assist identify the difficulty and get a right away repair.

The Minecraft Launcher is free to make use of, but the video games require purchase. The launcher can also be made to detect saved information and migrate them over upon login, so gamers needn't panic. Hopefully, with upcoming Minecraft updates and patches, the troubles with launching Minecraft will fade, and gamers can get pleasure from constructing without interruptions.
