Clenbuterol Side Effects. A case study has reported that the ingestion of 20 μ g of clenbuterol (which is the lowest reported dose of clenbuterol exposure leading to toxicity) results in tachycardia (rapid heartbeat), electrolyte imbalance, nausea, vomiting, anxiety, and increased blood pressure ().Once you get used to seeing yourself fit and active, you can get addicted.

Another day another walk

There's a lot of talkers in this world, but not a lot of doers. There's a difference between moving your mouth and moving your arse...dreamers dream, doers do.

Some of the users have reported Clenbuterol 'then and now results' in weight loss forums and blogs. The weight loss results from using Clen diet supplement is not identical with all the users. Some have shed up to 6 lbs after a week, but some other lost only 1 lb or less. A few others did not get any noticeable weight loss results from it.

A great way to make new friends who are also on weight loss journeys. Find inspiration for tasty recipes and keep each other motivated whilst being part of a great support network! .
