MAM growschedule

METROP MAM mother plant fertilizer is biologically degradable.

- On soil, give METROP MAM as needed in a ratio to of 50ml/100L of water. Once a week add METROP CAL GREEN 20ml/100L.
- On coconut mats, give METROP MAM as needed in a ratio 50ml/100L water combined with METROP CAL GREEN 20ml/100L.

	MAM	ROOT+	AMINO-XTREM	CAL-GREEN
Before ¹ cutting	75ml/100L ³	80ml/100L	90ml/100L	20ml/100L
After ² cutting	50ml/100L	80ml/100L	90ml/100L	20ml/100L

- In Hydroponics or Rockwool give METROP MAM daily at least 6x in a ratio of 75ml/100L water. This can be combined with METROP CALGREEN ratio 20ml/100L.
- Adjust levels for Hydro-systems for METROP MAM to 100ml/100L before cutting and 75ml/100L after cutting. Use METROP CALGREEN according to the grow schedule. pH recommended from 5.4 to 6.2 EC

*1 This is the Mother-plant the week before cutting

*2 Normal grow weeks

*3 For NFT and HYDRO systems Mother-plants need 6 x feeding per day

PH - Recommended PH is between 5.4 and 6.2 measured in the medium

Calgreen last in the lightly acidified water

Recommendations for Use:

Crop	Lts/Ha	mL/100 liter	Numbers and timing of applications
Potatoes	2.0-3.0	500	1-2 applications early on in crop cycle.
Vegatables	2.0-2.5	200	2-4 applications after transplanting
Fruits and vines	1.5-3.0	100-200	Start before flower formation, repeat every 15 days.
Citrus	1.5-3.0	100-200	First application 3 weeks after transplanting.
Cereals	2.5	250	1-2 applications.
Sugar beets	3.0	600	1-2 applications early on in crop cycle.
Ornamental plants	1.0-2.0	50-100	Use small doses on young or sensitives plants.

Full coverage

Full coverage is a type of insurance policy that provides the most comprehensive protection for your vehicle. It typically includes liability coverage, collision coverage, comprehensive coverage, and medical payments coverage. This means you are covered for damage to your own car, damage to other people's property, and medical expenses for you and your passengers. Full coverage is the most expensive option, but it provides the most peace of mind.

Cutting plant / Motherplant fertilizer

METROP MAM is a concentrated liquid fast-acting grow fertilizer for the seed or cuttings producing Motherplant, universally developed for cultivate in pots, in open soil and in hydroponic systems.

Motherplants used for cuttings need a different nutrient requirement than plants that just need to grow or thrive. These cutting plants have to grow continuously and recover from the cut resulting in an increasingly weaker plant. Making plant cuttings and seeds from mother plants is therefore a separate technique.

Due to the high Nitrogen/Phosphorus content, METROP MAM makes your plant stem and leave stronger and healthier and is an ideal preparation for strong cuttings.

METROP MAM is low in Potassium to counteract male seed or hemaphrodite cuttings.

MAM motherplant fertilizer contains a cocktail trace elements and natural Auxins for the recover after plant cloning.

For a high plant cut or seed production, use METROP MAM motherplant fertilizer in combination with METROP CALGREEN, ROOT+, AMINOXTREM and ENZYMES.

NPK 20-20-8+TE

Metrop MAM motherplant fertilizer is a high concentrate.

- Max 100ml per 100L water - Hydroponics/potting soil
- Max 3Litre per Ha - Agriculture
- Max 15ml per 5Litre water - Homegarden foliar
