Ruby Mine is a resource rich mine that has just been discovered by a handful of adventurers.

The mine extends a thousand miles and you can now lease a piece of land and hire miners that will non-stop mine ruby for you.

MINING

After all expenses for mining you will be able to earn back up to 8% daily.

REFERRAL

Convince your friends to open a mine and receive 12.5% on all their deposits and compounds.

COMPOUND

Re-hire daily rewards to get more miners that will non-stop get rubies out of the ground and increase your earnings exponentially.

8% fee total fee on deposit and sale of Rubies

(6% development + 2% marketing fees)

There is no fee taken when you re-hire.

STRATEGY

A handful of experienced miners developed their most profitable strategies without ever exhausting their mines.

Yet, each having their own mine, they work together as a team.

They re-hire miners 6 times per week and take profits 1 time per week.

Taking profits too often will exhaust your mine and therefore decrease your earnings in the short and in the long run.

How does Ruby Mine work?

You deposit your AVAX and every day you will earn up to 8% on your deposit amount that accrues rewards throughout the day. Please note, that your rewards will decrease with each subsequent claim.

To keep the highest rewards of up to 8% per day, we encourage you to compound your rewards for six days and claim on the seventh day (6/1 strategy). This mechanism is built into the contract.

What is the minimum deposit?

0.1 AVAX

Do you have any anti-whale mechanisms?

6/1 is the way to go. It is not just a strategy, furthermore also our anti-whale mechanism. It will ensure that the TVL constantly increases.

What is the best strategy?

6/1. 6 compounds + 1 withdrawal per week.

Make an action every day. If you start getting greedy and trying to save up your rewards, your earnings will decrease as well.

How long will the contract pay out rewards?

As long as there is balance in the contract, there will always be rewards.

What prevents the developers from rugging?

A: The contract is immutable and audited, meaning that once it is deployed the developers have no access to the contract and cannot send anything out of the wallet.
