Features:

- A wide variety of motors are available to meet specific application needs.
- Heavy duty construction, durable and weather resistant.
- Non-overloading backward inclined wheels, blades and inlets fabricated from 3003-H14 aluminum.
- Wall mount applications, units up to 24" nominal wheel can be wall mounted.
- Forced fresh air through the motor compartment cools motor and ensures long motor life.
- Quick release latches allow for easy access to motor compartment.
- Variable pitch motor pulley allows for field adjustment and system balancing.
- High efficiency combined with low tip speeds result in quiet operation.

Features:

- Sensorless vector control algorithm improves not only the torque control characteristics, but the speed controllability in an uncertain condition caused by the load variation as well.
- The auto tuning algorithm in the IC5 sets the motor factors automatically that brings the traditional commissioning difficulties mainly in low speed by the load variation and the low torque generation to a settlement.
- The IC5 adopts highly efficient DSP(Digital Signal Processing) chip to improve processing speed, flexibility, stability and etc.
- The IC5 provides PNP and NPN signals for outside controllers.
- It works with 24Vdc regardless of the type of PLC or control signals.
- The IC5 provides the most popular communication interface, ModBus-RTU for remote control by PLC or other devices.

Features:

- Selectable V/f, sensorless vector control
- Motor parameter Auto-tuning
- Powerful torque at overall speed range
- IP20 enclosure, UL Type 1 (Option)
- Selectable manual/automatic torque boost
- Selectable PNP/NPN input signal
- 2nd motor control and parameter setting
- Enhanced process PID control
- Built-in RS485 (LS Bus / Modbus RTU) communication
- Remote control using external keypad * RJ45 cable(Optional)
- Upgraded functions:
 - Sleep & Wake-up (Energy savings)
 - KEB(Kinetic Energy Buffering) protection
 - Low leakage PWM algorism
