Do you have these challenges in your recruitment service ?

How many items apply to you?

Please tick the box that applies.

- Our in-house system costs a lot for maintenance.
- Our in-house system is too complex to improve, or costs too much to improve.
- Our system works too slowly when we search and add records.
- Our system has been in place for more than three years and outdated.
- We waste our time on too many paperwork for candidate, jobs, sales and contracts management.
- We can't track candidates and jobs status in real time on our system.
- It takes 3+ minutes to input resume/CV on our system.
- We've been interested in using cloud-based software.
- Security matters to us, but we haven't addressed it enough yet with our system.
- We think the importance of systematization is increasing due to the pandemic.

Results of a diagnosis

1-3 ticks

Consider reviewing the system again in three years.

4-6 ticks

It's time to review your in-house system or consider switching to the cloud.

7-10 ticks

Now is exactly the time to consider a cloud-based system.

Here's the facts you have to aware:

HR-Business Cloud is capable to solve such challenges!

Speedy

Automatic capture of candidate information is now commonplace through API integration with websites and other recruitment media, and our HR-Business Cloud can quickly create a candidate database with no limit on the amount of data.

Quality

HRBC has a feature called Auto-matching and searching for criteria is just one click away. No need to search by age, annual salary, preferred work location, experienced job etc., to find a candidate that matches the criteria. Now, recruiters should be spending less time searching for candidates and more time focusing on value-added tasks that only Recruiters can do.

Timely

With HRBC, you can track the selection process in real time with one click. This is an essential feature for timely support in recruitment.

Price list

Pricing is based on the area of your contract.
